19. When something looks unclear
20. Words you might see

Quick start (5 minutes)

1. **Create your account.**
2. **Complete your profile.**
3. **Create your first opportunity.**
4. **Publish it.**
5. **Review your matches.**
6. **Accept a match to start working together.**

The sections below walk through each screen in plain language.

1. Platform overview

What this page is

PMTwin helps professionals and companies find each other, agree on work, and track delivery—starting from an **opportunity** (what you need or offer), through **suggested matches**, then a **deal** and **contract** when you are ready.

What you can do here

- Post what you need or what you offer.
- See suggestions that fit your post.
- Agree with others and manage the work in one place.

Step-by-step actions

Use this guide in order, or jump from the table of contents to any topic.

Tips

- A complete profile helps others trust you.
- A clear opportunity gets better suggestions.

1.1 Who uses PMTwin

What this page is

People join as a **company** or as an **individual**. Individuals often choose **Professional** or **Consultant** depending on how they work.

What you can do here

- **Company:** Represent your organization; post needs or offers on behalf of the business.
- **Professional:** Offer your skills and respond to opportunities.
- **Consultant:** Same idea, with a focus on advisory or expert services.

Step-by-step actions

> **Your steps**
>
> After you sign in, open
> **Profile**
>
> and make sure your details match how you work (company vs individual).

Tips

If your organization reviews new accounts, you may need approval before everything is available.

2. Account & sign in

2.1 Registration

What this page is

The sign-up screens walk you through creating an account. You choose whether you are a **business** or an **individual**, then fill in the questions step by step.

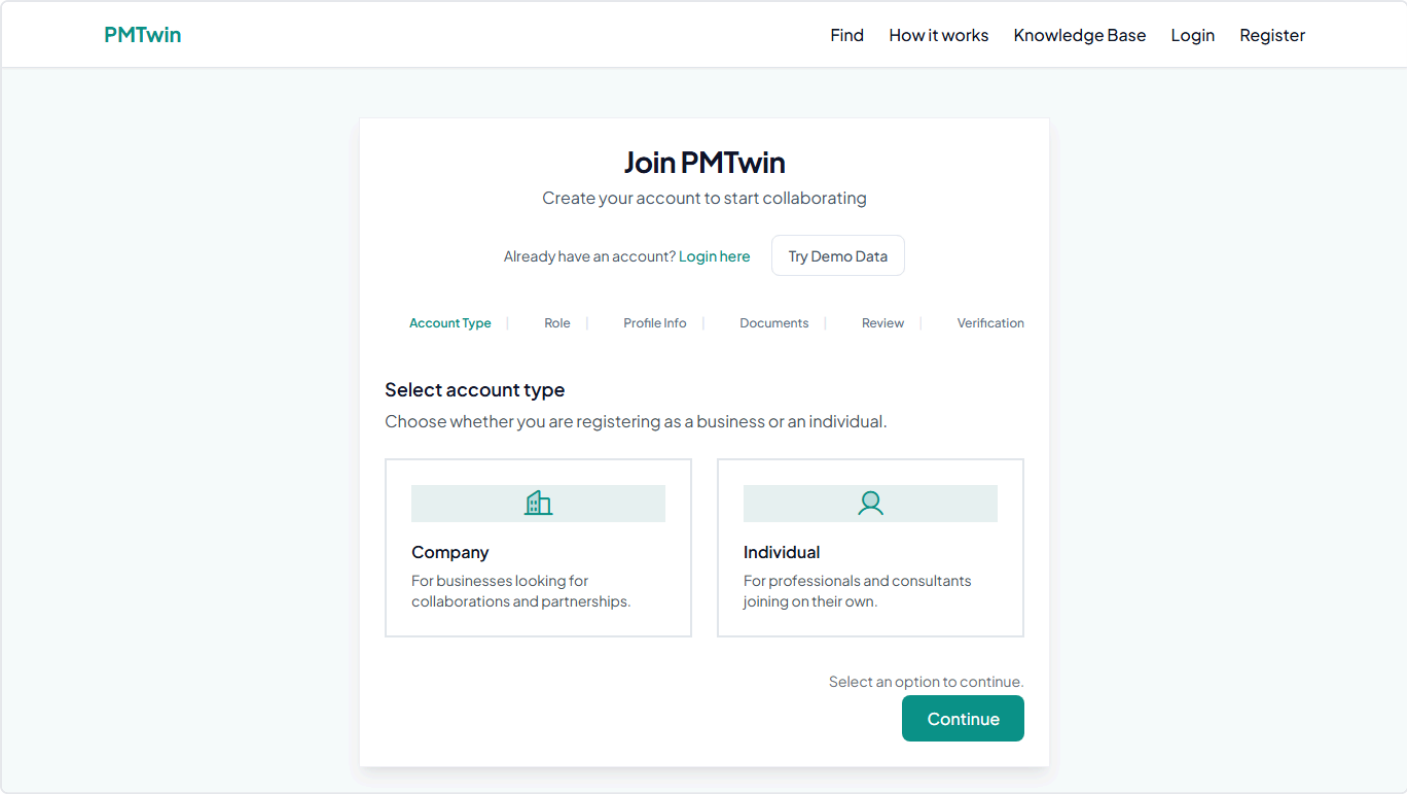

Figure 1 — Registration.

What you can do here

- Enter your email and a secure password.
- Add your name or company name and the details the form asks for.
- Accept the terms when asked.

Step-by-step actions

> **Your steps**
>
> Open
> **Register**
> from the welcome screen. Choose company or individual. Complete each step. Click submit. If your organization reviews new accounts, wait for confirmation before everything is unlocked.

Tips

- Use an email you check often.
- Keep your password private.

2.2 Login

What this page is

The login page is where you enter your email and password to open PMTwin.

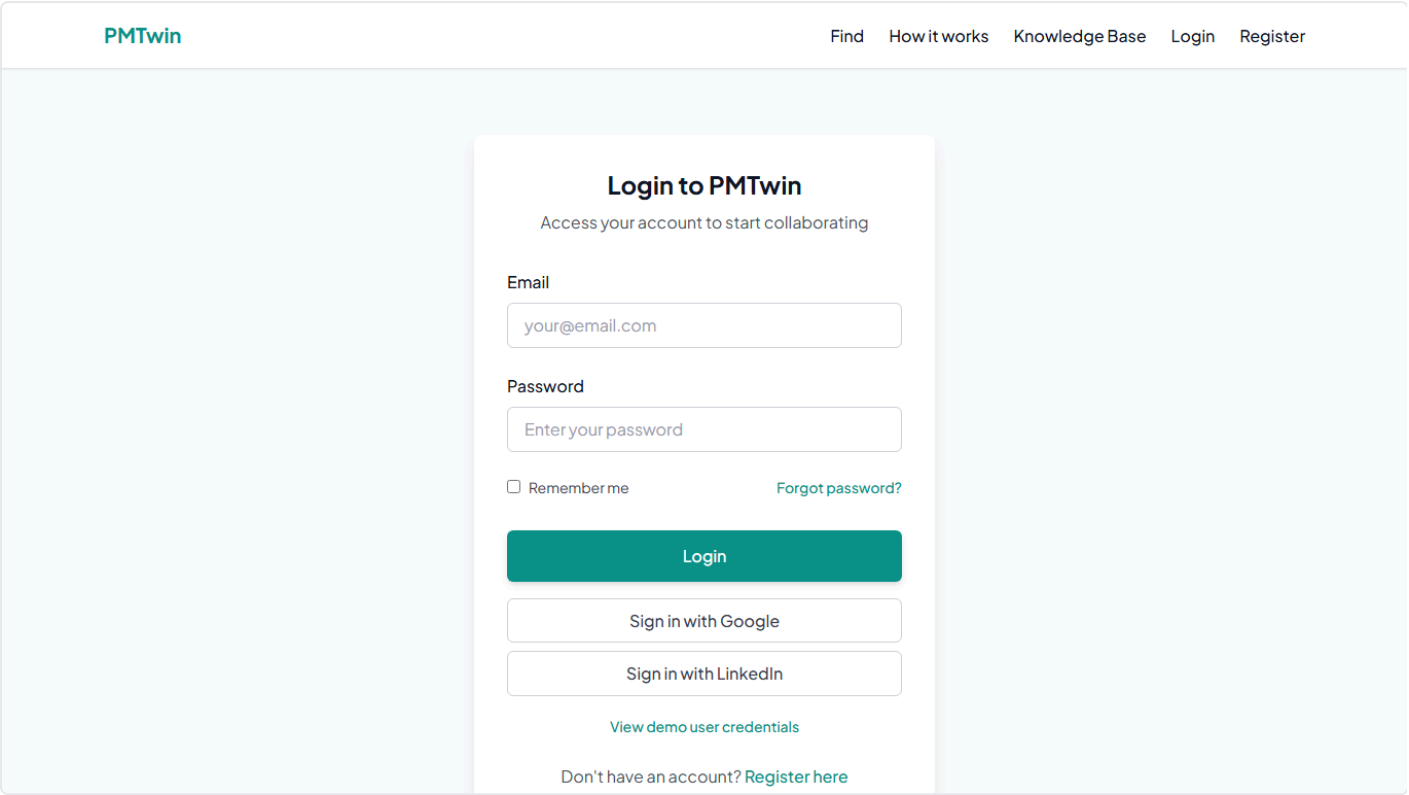

Figure 2 — Login.

What you can do here

- Sign in with your email and password.
- Use **Forgot password** if you need to reset.

Step-by-step actions

> **Your steps**
>
> Open **Login**. Type your email and password. Click **Login**. You should land on your home dashboard.

3. Profile

What this page is

Your profile is your public-facing introduction. It helps others understand **who you are** and **what you do** before they connect with you.

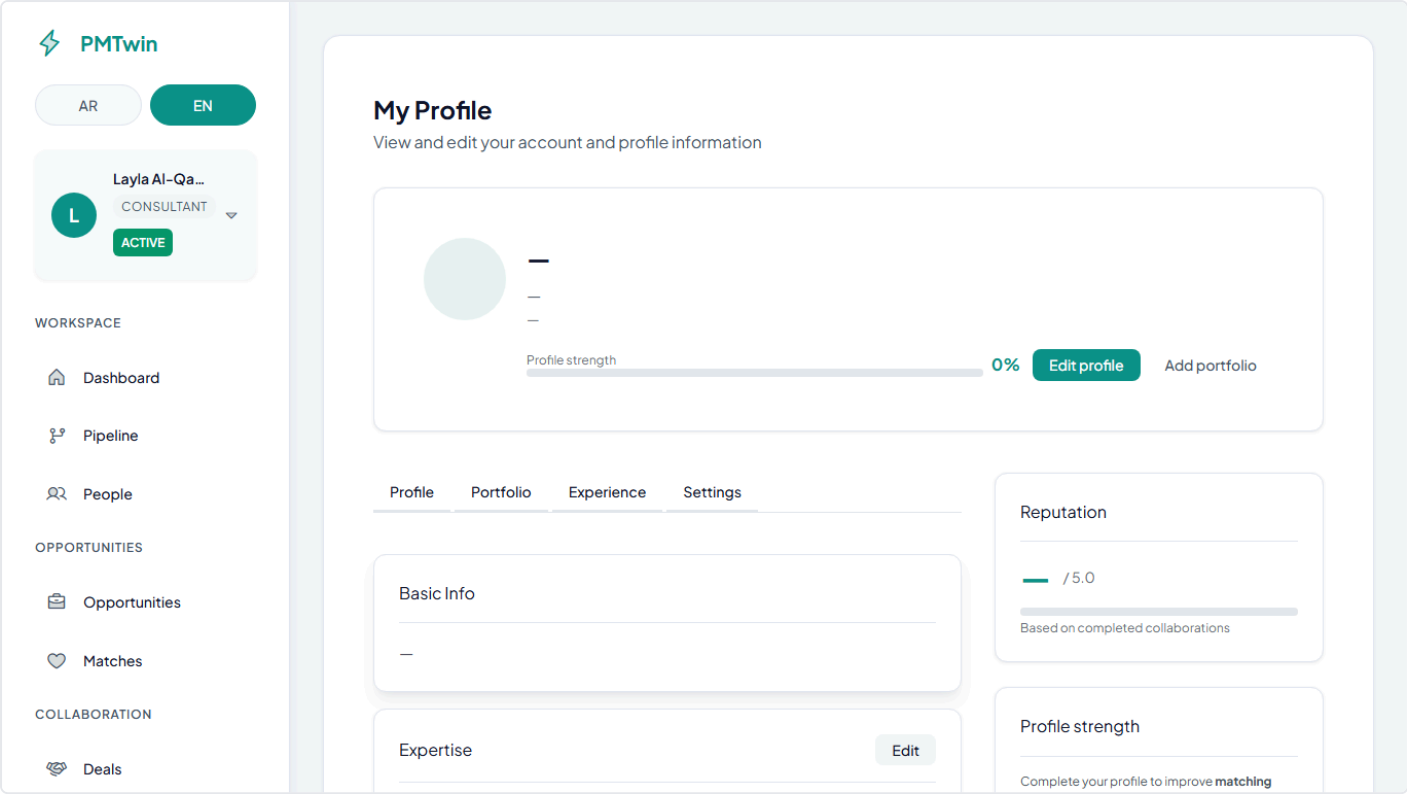

Figure 3 — Profile.

Why it matters

A strong profile leads to clearer conversations and better suggestions when people compare your skills to their needs.

What you can do here

- **Skills** — what you actually deliver (be specific).
- **Experience** — years and roles that support your skills.
- **Certifications** — licenses or certificates that matter in your field.
- **Languages** — how you communicate.
- **Social links** — for example LinkedIn or a portfolio site.

Step-by-step actions

> **Your steps**
>
> From the side menu, open
> **Profile**
> . Fill in or update the fields. Save before you leave the page.

Tips

- Add 10–15 clear skills instead of one long vague list.

- Update your profile when your focus changes.

4. Home (Dashboard)

What this page is

The home page is your starting point after login. It shows useful counts and shortcuts.

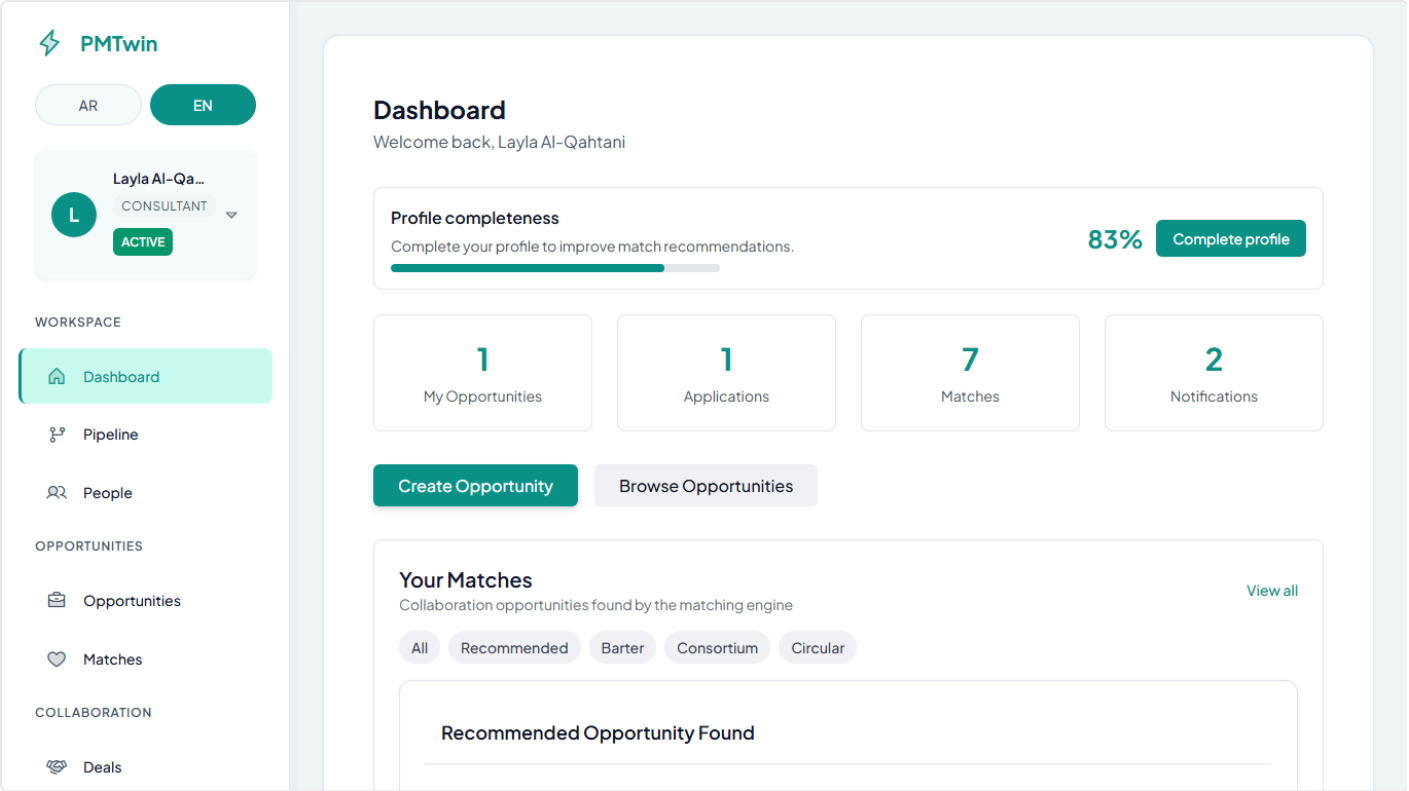

Figure 4 — Home dashboard.

What you can do here

- See summaries of your opportunities, matches, applications, and alerts.
- Jump to common tasks from cards or the side menu.

Step-by-step actions

Your steps

Use the
left menu
to go to Pipeline, Opportunities, Matches, Deals, Contracts, Notifications, or Profile. Tap a summary card if it takes you where you want to go.

5. Opportunities

What this page is

An **opportunity** is your post: what you are looking for, what you offer, or both. When you **publish**, others can discover it and the system can suggest good fits.

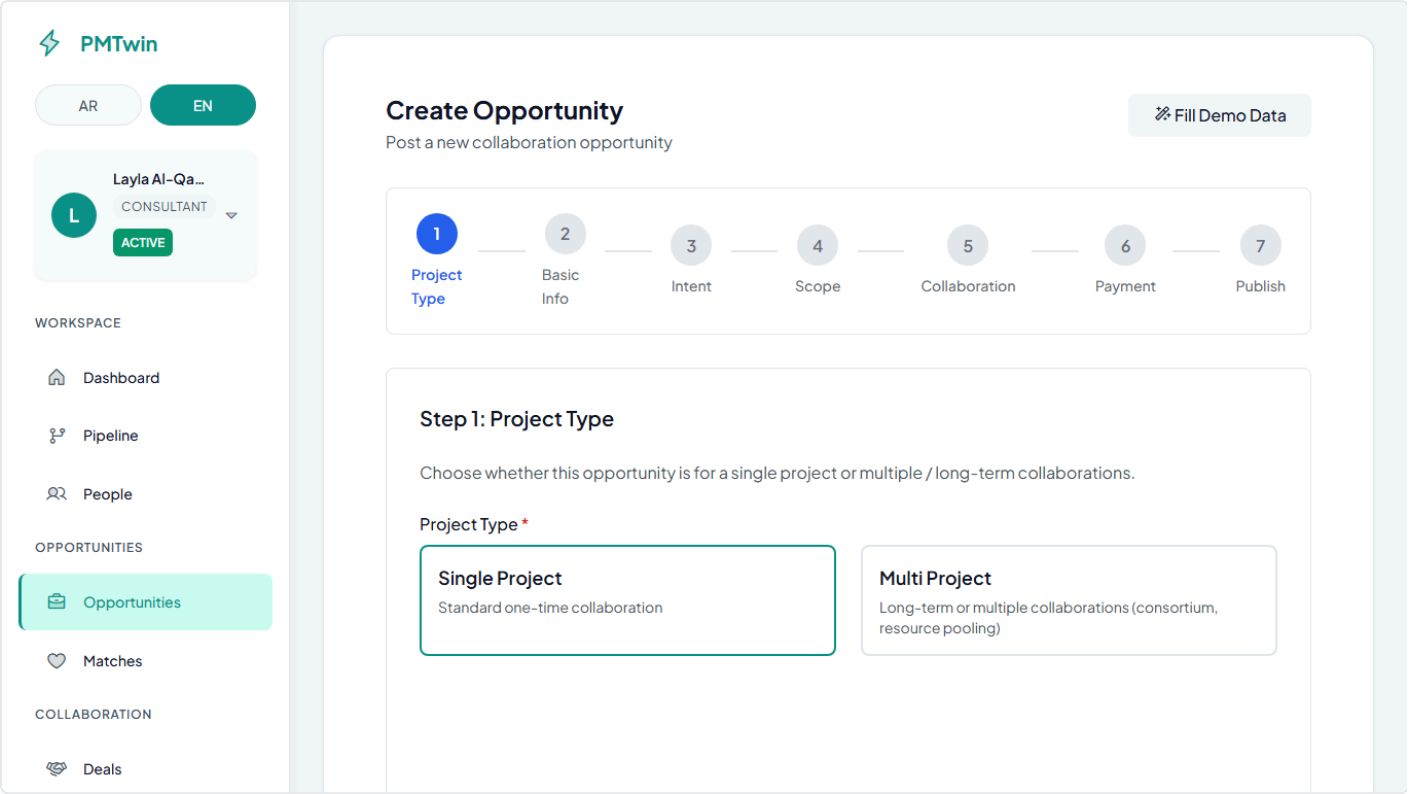

Figure 5 — Create opportunity.

5.1 Create opportunity — step by step

The form is a **wizard**: follow the steps at the top and use **Next** and **Back**. Fields marked with * are required.

Step 1 — Project type

What you select

Single project (one clear piece of work) or Multi project (ongoing program or several related collaborations).

What it means

It sets the tone—short engagement vs longer-term partnership.

Step 2 — Basic information

Title — Short, clear headline. **Description** — Enough detail that someone understands scope and expectations.

Location & how you work — Where work happens and whether it is on-site, remote, or hybrid. **Dates** (if shown) — Start, deadline, or end dates help others see timing.

Example

Field	Example
Title	Need structural engineer for shop drawing review
Skills (later step)	Structural Engineering, AutoCAD
Budget (later step)	5,000 – 10,000 SAR
Timeline	About 2 months

Tips: Use a clear title. Add real skills. Set a realistic budget and timeline.

Step 3 — Intent

Need — You are looking for something. **Offer** — You provide something. **Need + Offer** — Both apply (for example exchange-style setups).

What it means: It helps steer who should see your post and how suggestions are found.

Step 4 — Scope

Skills and tags — List what matters for delivery. Skills are important because they describe the work in words others search for.

Sectors and interests — Extra context so the right people notice your post.

Step 5 — Collaboration model

Choose the type of collaboration (for example project-style, partnership, hiring, or competition-style). Follow the questions and fill any extra fields that appear.

What it means: Different setups ask different follow-up questions so the form matches your situation.

Step 6 — Payment & value

Set your **budget range** and how value is exchanged (cash, equity, profit-sharing, barter, or a mix). This helps others see if the opportunity fits them.

Step 7 — Review & publish

Check everything. Then either **save as draft** (only you can see it) or **publish** (others can find it and suggestions can appear).

Step-by-step actions

> **Your steps**
>
> Open
> **Opportunities**
> →
> **Create**
> . Complete each step. On the last step, choose
> **Publish**
> when you are ready.

After you publish

The system automatically looks for suitable matches for your opportunity. Check the **Matches** page after a short time.

5.2 Draft vs publish (short)

- **Draft** — Work in private; nothing is visible for matching.
- **Publish** — Your post is live; others can discover it and you can receive suggestions.

6. Matches

What this page is

A **match** is a **suggested collaboration** based on your opportunity and another party's opportunity. It is a starting point—not a final agreement.

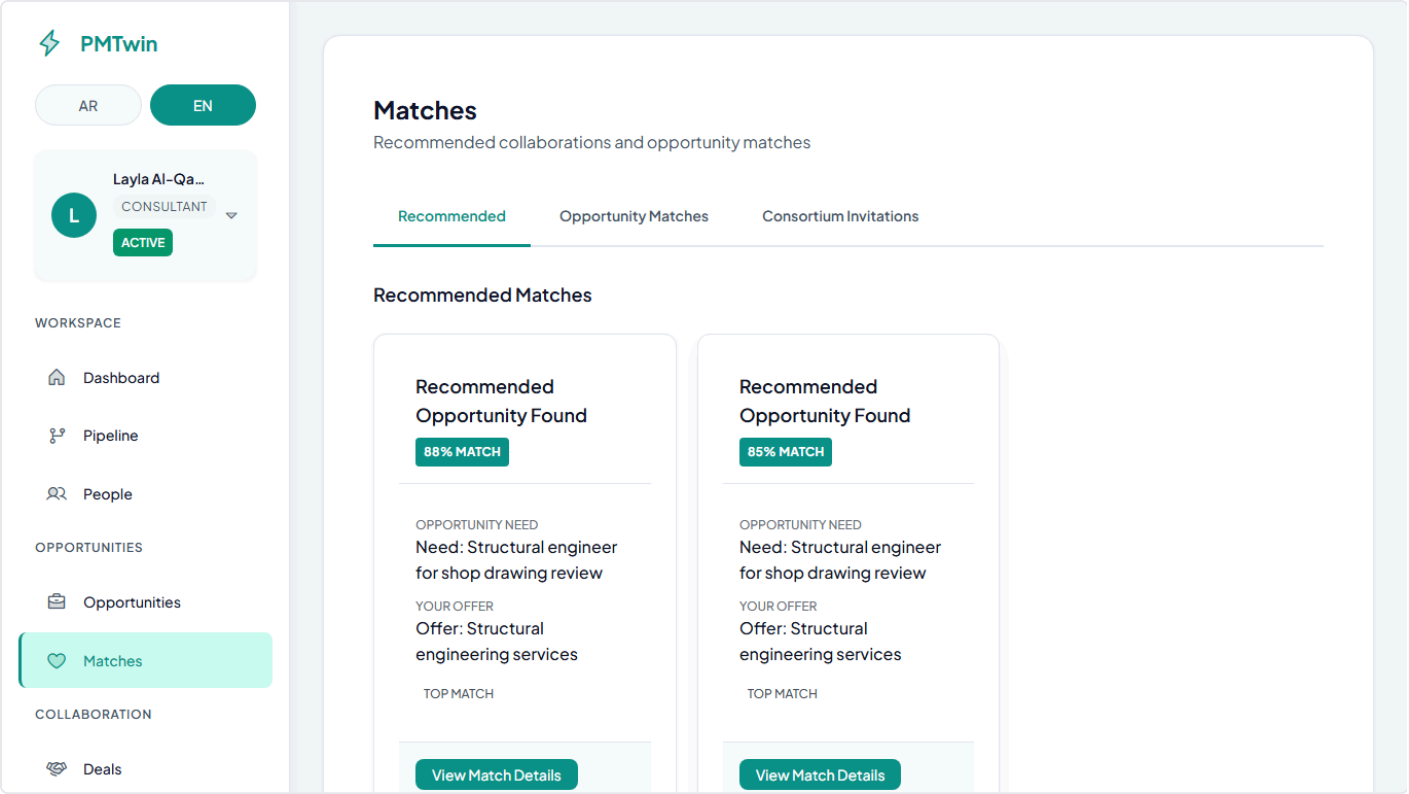

Figure 6 — Matches.

What you see

- A **match score** — how closely the suggestion fits (higher usually means a better fit).
- The **other party** and short context.
- The **type** of match (for example simple pairing, barter-style, group, or chain-style).

What affects the score (plain language)

Mainly: how well skills line up, whether budgets and timing make sense together, location and work mode, and trust signals when available. Small changes in your post can change the score.

What you can do here

- Open a match to read details.
- Accept or decline.

Step-by-step actions

> **Your steps**
>
> Open
> **Matches**
>
> from the menu. Click a row to open details.

Tips

- If you see few or no suggestions, widen skills slightly or adjust budget and dates, then publish again.

7. Match details

What this page is

This screen explains one suggestion: who is involved, what is being exchanged, and your choices.

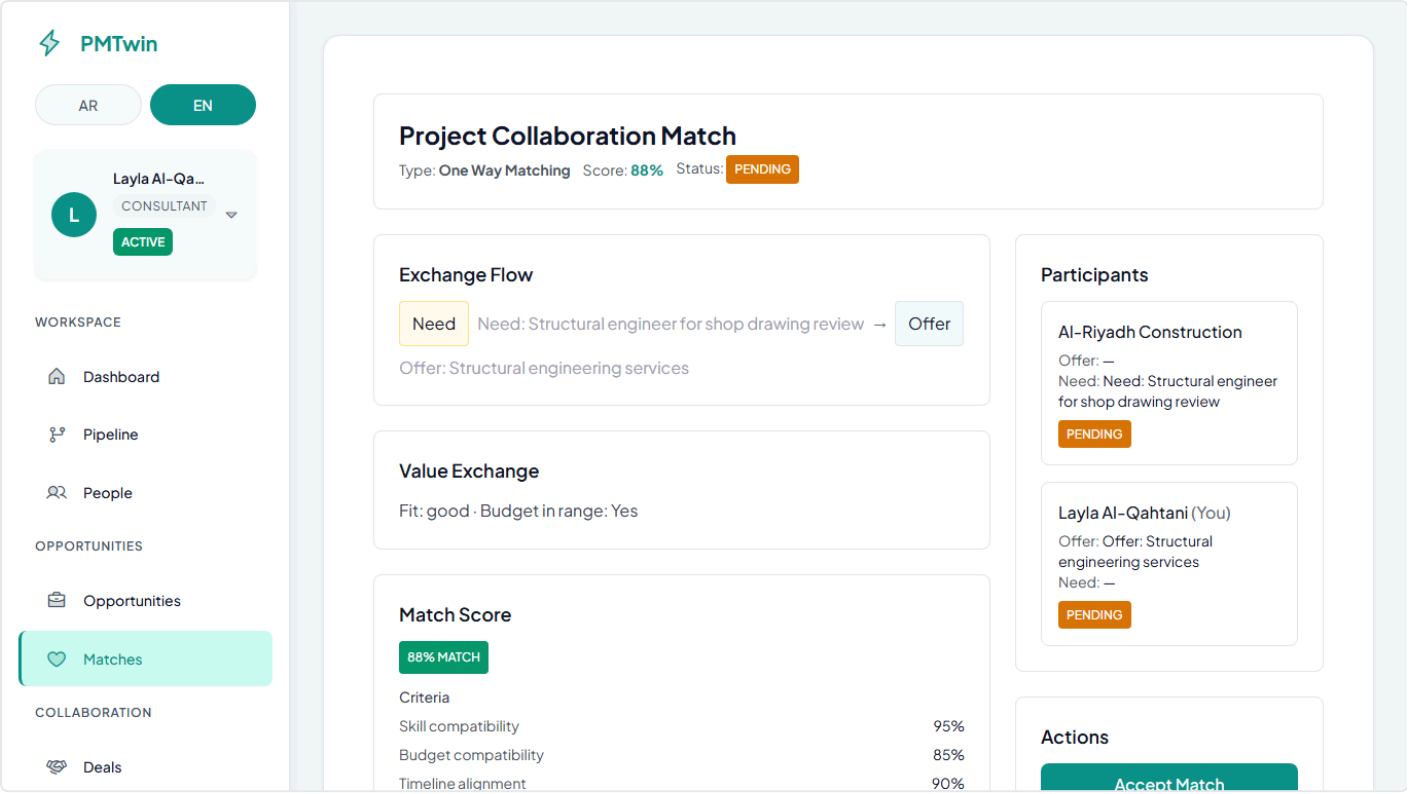

Figure 7 — Match details.

What you can do here

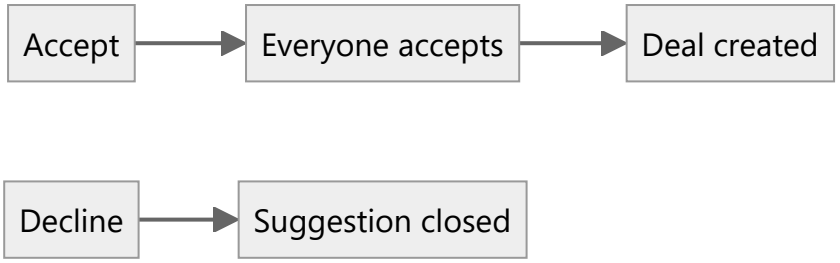
- **Accept Match** — You agree to move forward with this suggestion.
- **Decline** — You close this suggestion.
- **Message** or **Start negotiation** — When shown, use these to talk things through.

Step-by-step actions

> **Your steps**
>
> From
> **Matches**
> , open a match. Read the summary. Click
> **Accept Match**
> or
> **Decline**
> . Everyone involved needs to accept before the next step.

When everyone accepts

When all participants have accepted, **a deal is created for you**. You may be taken straight to your deal. If not, open **Deals** from the menu and select the new deal.



Accept
Everyone accepts
Deal created
Decline
Suggestion closed

8. Applications

What this page is

Some opportunities let people **apply** instead of only receiving automatic suggestions. Applications are **requests you send or receive** to join or bid on an opportunity.

Matches vs applications (simple)

	Who starts it	When to use it
Suggestions (Matches)	The service suggests pairs for you	You want ideas based on your published post
Applications	A person applies to your post (or you apply to theirs)	You want formal inbound interest or you want to apply

What you can do here

- Track applications on the Pipeline **Applications** tab.
- Move cards between columns when the page allows, to reflect review stages.

Step-by-step actions

> **Your steps**
>
> Open
> **Pipeline**
> →
> **Applications**
>
> tab. Move cards between columns when permitted.

9. From match to deal

What this page is

After everyone accepts a match, you move from “we might work together” to “let’s manage this in a deal.”

What happens

When the last person accepts, **a deal is created automatically** for the group. Open it from **Deals** if you are not taken there directly.

Step-by-step actions

> **Your steps**
>
> Complete acceptance on the match screen. Then open
> **Deals**
>
> and continue planning scope, timing, and next steps there.

10. Deals

What this page is

The **deal** is where you manage the agreement: scope, timing, value, and progress. Think of it as your shared workspace for the collaboration.

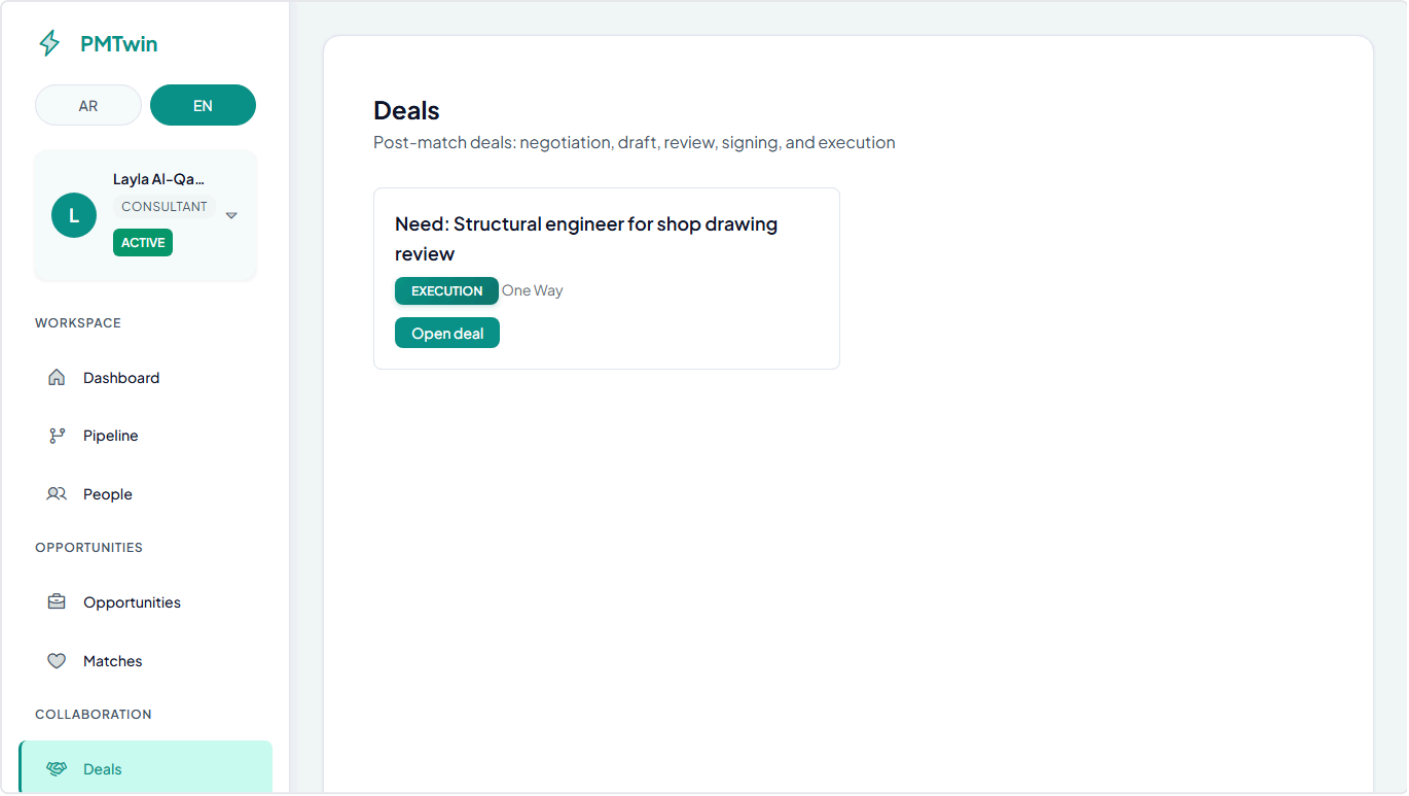


Figure 8 — Deals list.

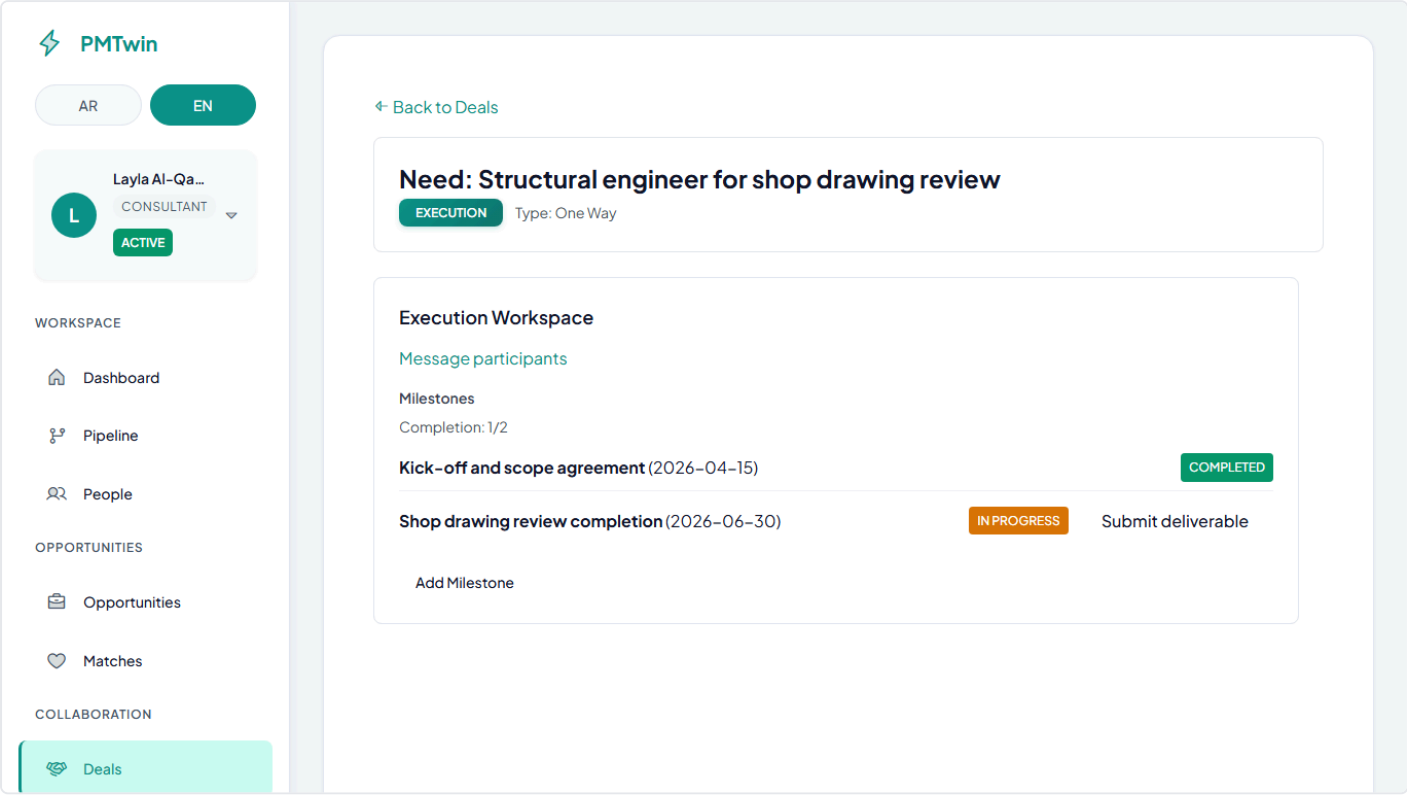

Figure 9 — Deal detail.

What you can do here

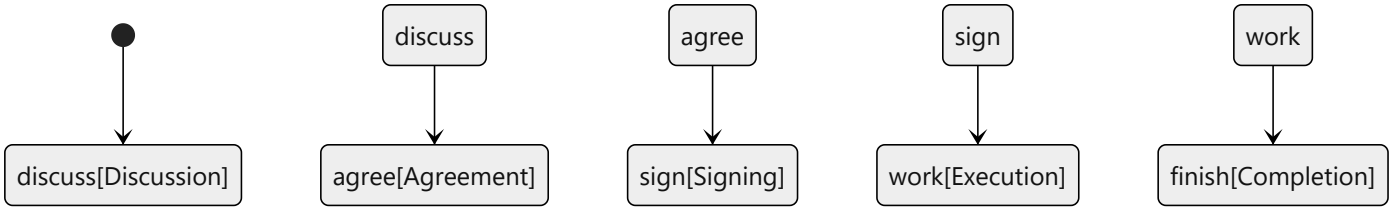
- See who is involved and what was agreed in principle.
- Move through stages from discussion to signing and execution.
- Track deliverables and milestones (see next section).

Stages (simple words)

- **Discussion** — Align on needs and terms.
- **Agreement** — Shape scope, value, and timeline.
- **Execution** — Do the work and track milestones.
- **Completion** — Close out when work is done.

Step-by-step actions

> **Your steps**
>
> Open
> **Deals**
>
> → choose your deal. Use the buttons and sections on the page to advance and update information.



11. Milestones

What this page is

Milestones break the work into steps with dates and deliverables. You manage them **inside the deal**—there is no separate milestones home page.

What you can do here

- Add or review milestones (title, date, what must be delivered).
- Submit work for review when ready.
- Approve or ask for changes, depending on your role.

Step-by-step actions

> **Your steps**
>
> Open your deal → find the milestones section → update or submit as guided on screen.

Status words you may see

- Not started → In progress → Submitted → Approved (or sent back for changes).

12. Contracts

What this page is

The **contract** is the official agreement between all parties. It records scope, payment, and timeline in one place.

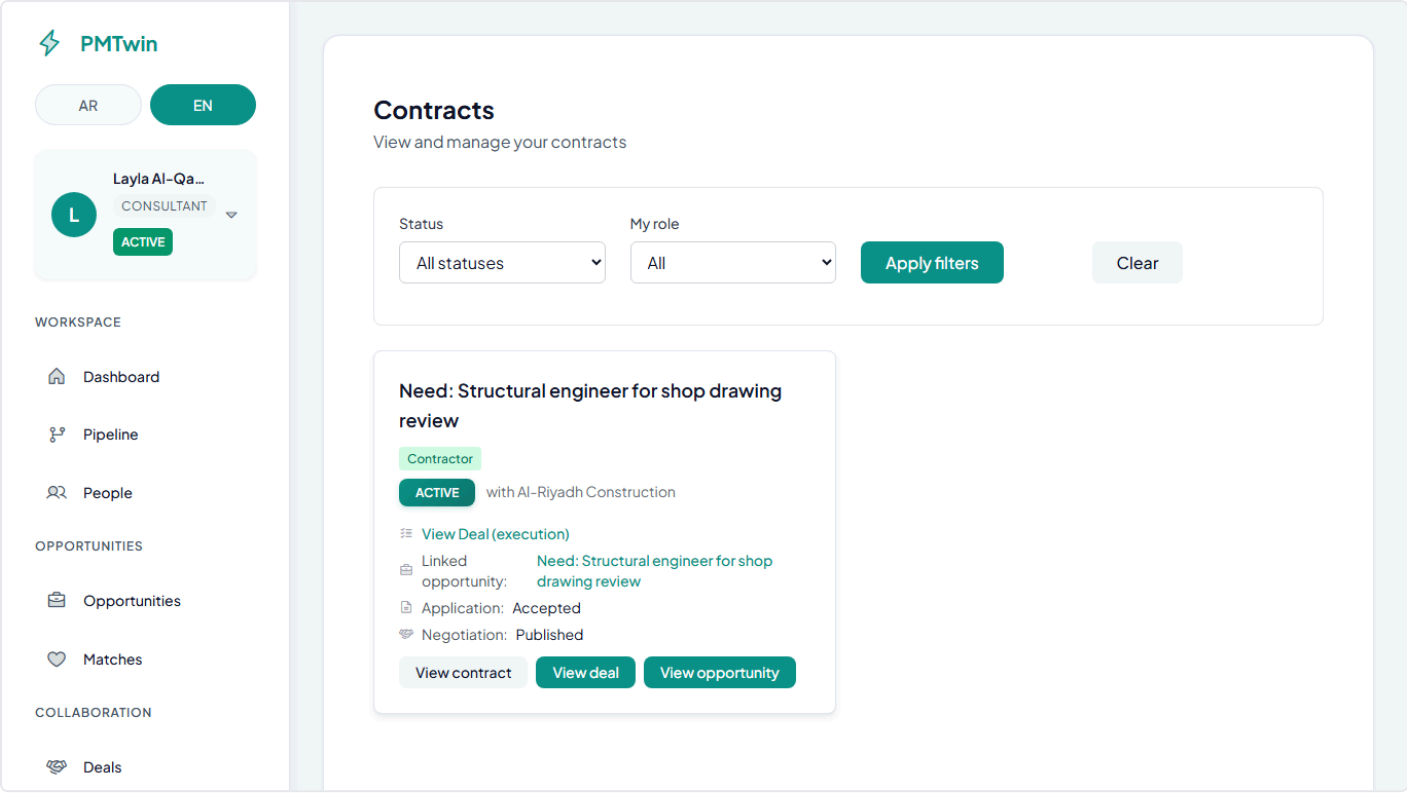


Figure 10 — Contracts.

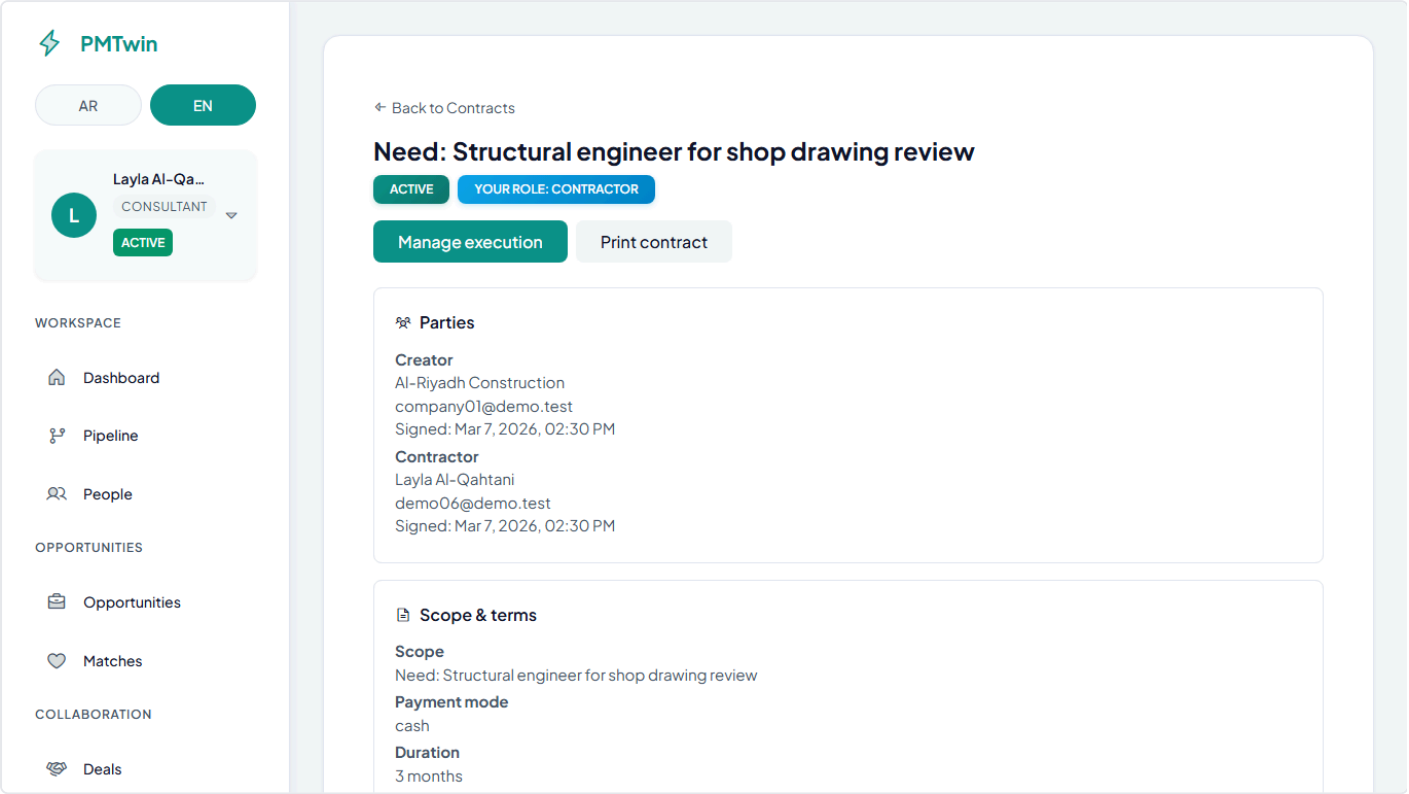

Figure 11 — Contract detail.

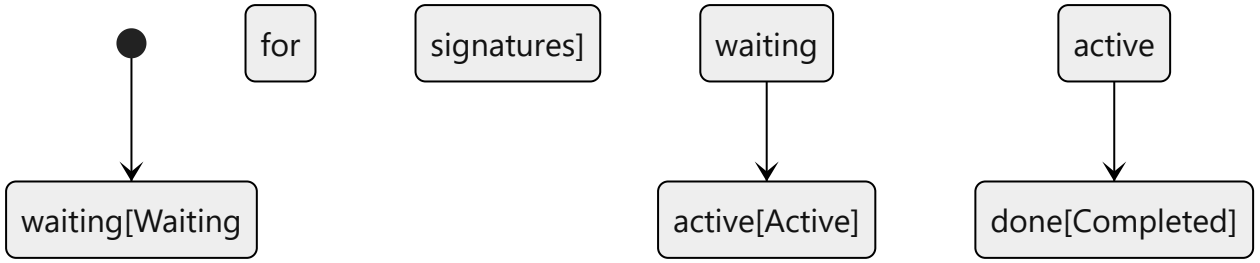
What you can do here

- Read parties, scope, value, and dates.
- Complete signing steps when it is your turn.

Step-by-step actions

> **Your steps**
>
> Open
>
> **Contracts**
>
> → select your contract → follow the signing prompts for your role.

When everyone has signed, the contract becomes active for execution.



13. Notifications

What this page is

Notifications keep you updated about matches, deals, contracts, and account messages—so you do not miss important steps.

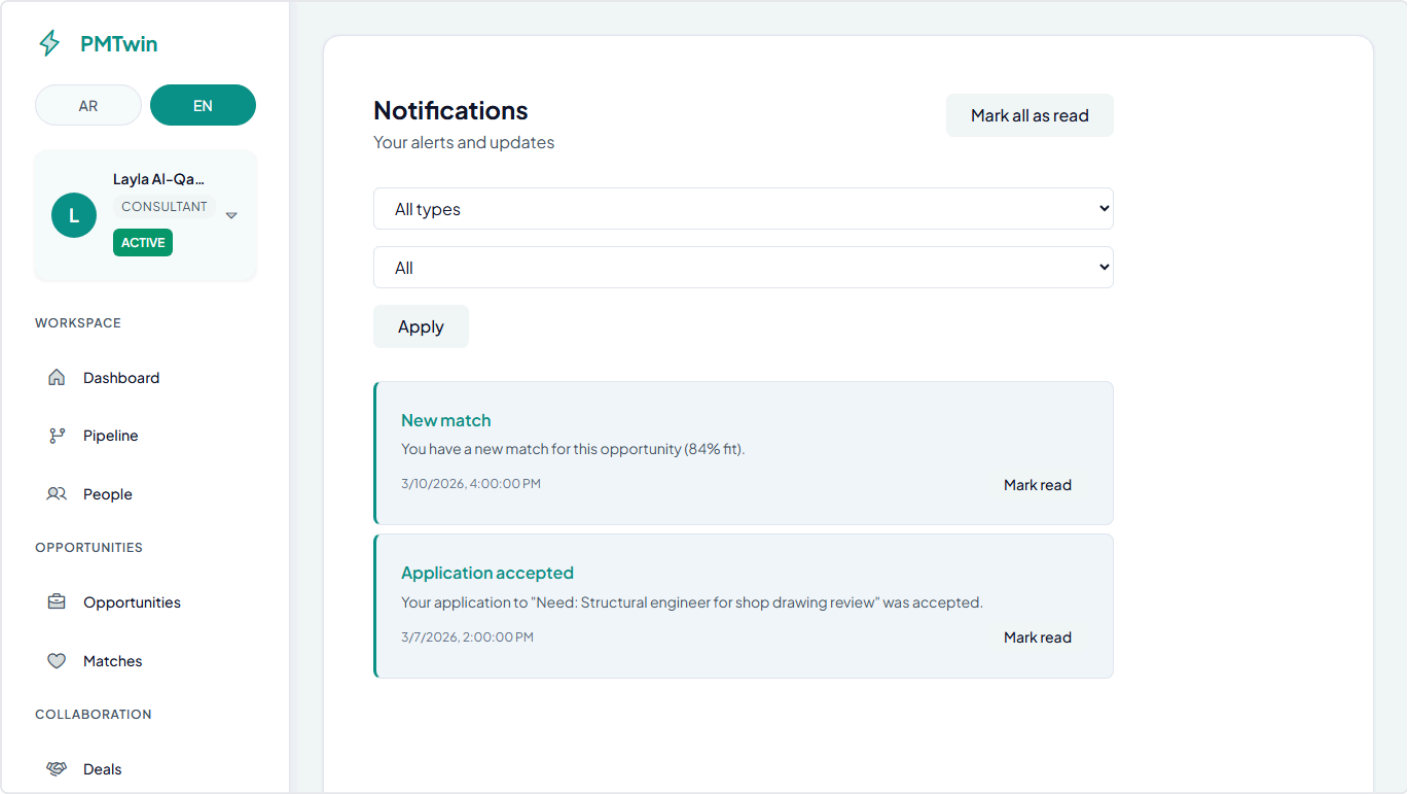


Figure 12 — Notifications.

What you can do here

- Read new updates.
- Open the related page from a notification when a link is provided.

Step-by-step actions

> **Your steps**
>
> Open
> **Notifications**
> from the menu. Tap an item to go to the right screen.

14. Pipeline

What this page is

The pipeline helps you **track your opportunities and applications** on boards. You can see what is draft, live, in progress, or closed at a glance.

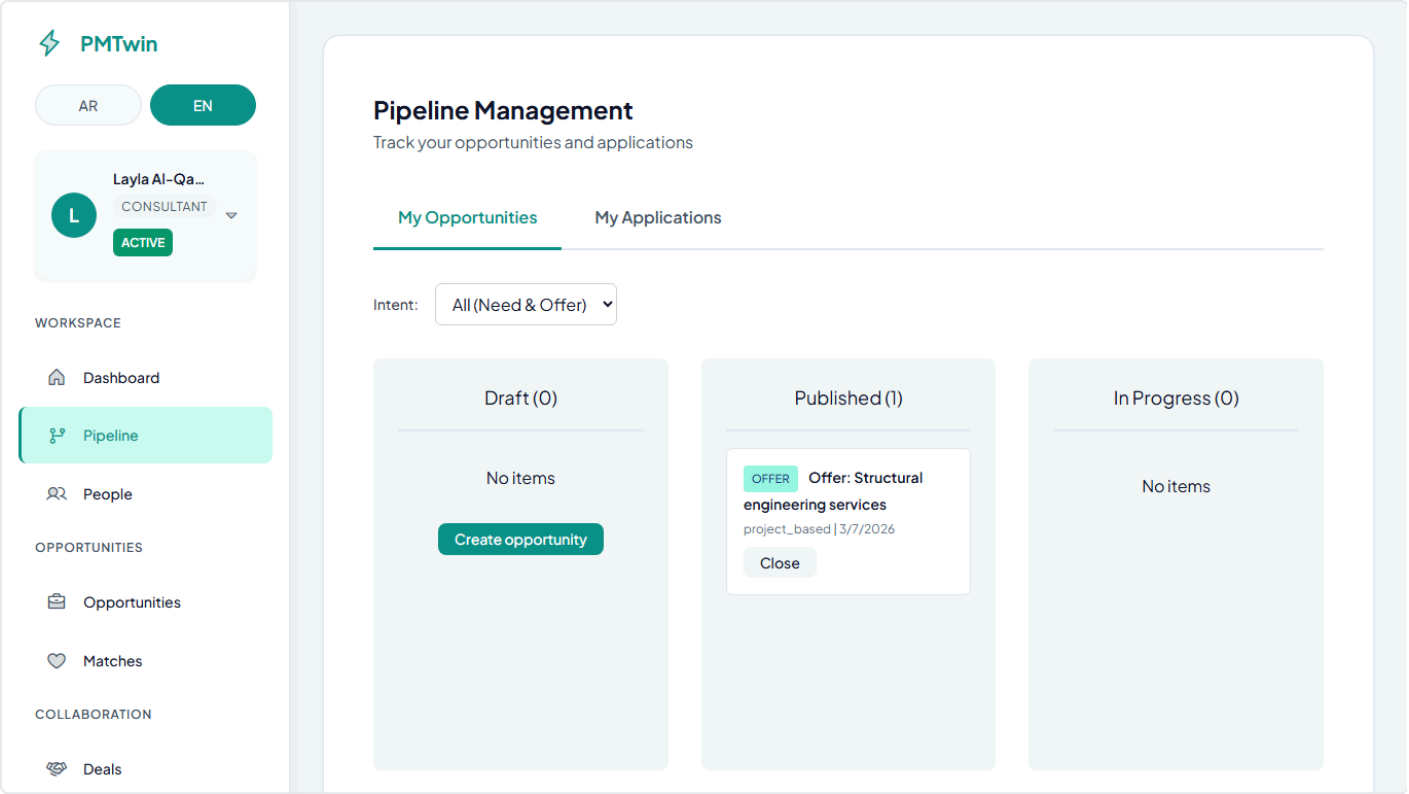

Figure 13 — Opportunities board.

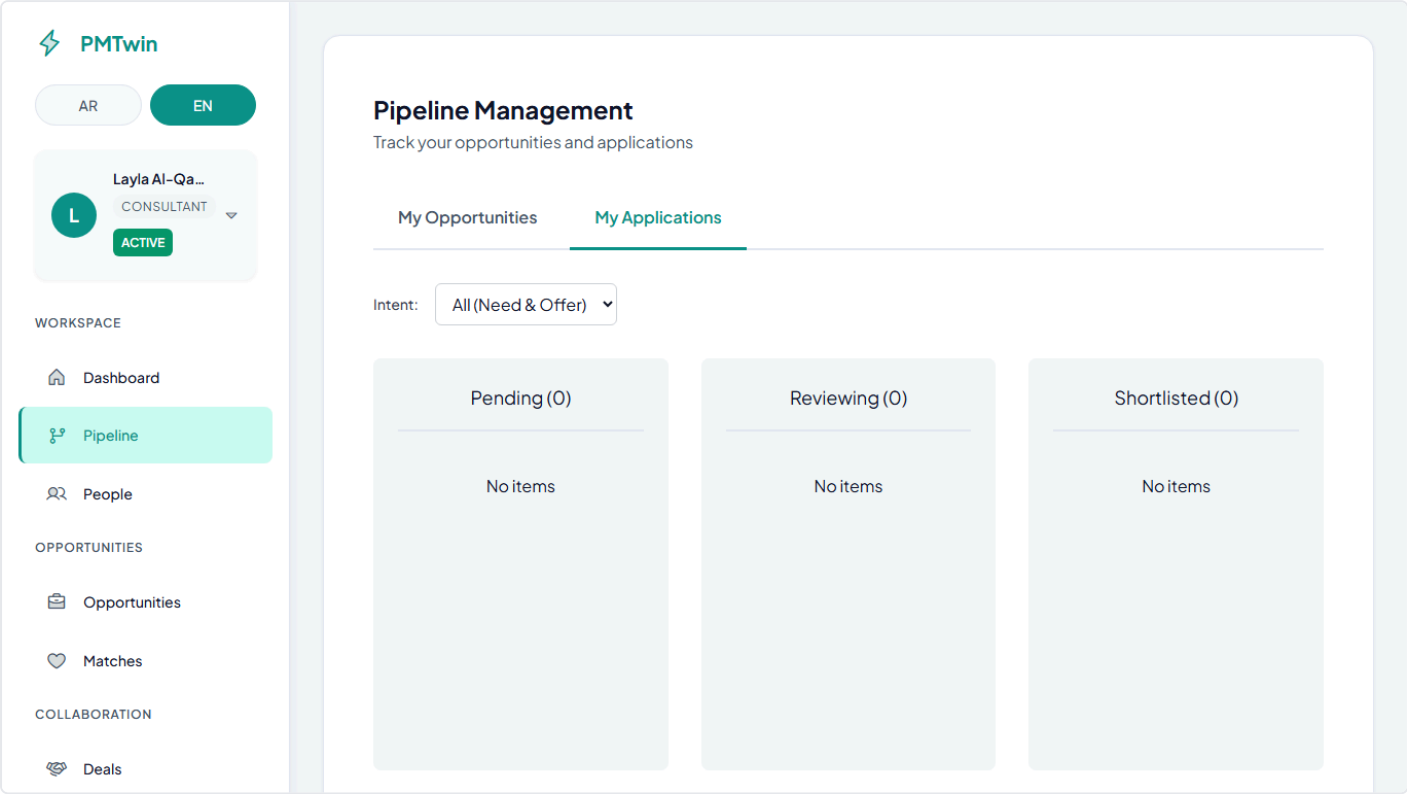

Figure 14 — Applications board.

Opportunities columns (simple)

- **Draft** — Not published yet.
- **Published** — Live for others to find.
- **In progress** — Active discussion or negotiation.
- **Closed** — Finished on this board.

Applications columns (simple)

Columns follow the review journey—for example pending, reviewing, shortlisted, in discussion, accepted, or not selected. Labels may vary slightly by screen.

What you can do here

- Drag a card to another column when the page allows, to update its stage.
- Use this view together with **Matches** for suggestions (matches are not managed on this board).

Step-by-step actions

> **Your steps**
>
> Open
> **Pipeline**
> . Switch between
> **Opportunities**
> and
> **Applications**
> tabs. Drag cards only when you intend to change the stage shown.

15. Your journey from start to finish

What this page is

A single checklist of the full path from signup to finishing work.

What you can do here

Use it as a reminder or training checklist in order.

Step-by-step actions

1. Create your account.
2. Fill in your profile.
3. Create an opportunity and save a draft if you need time.
4. Publish when you are ready.
5. Review matches and talk to others if needed.
6. Accept when everyone agrees.
7. Work in the deal and sign the contract when offered.
8. Complete milestones and close out.

Tips

You can return to any earlier step if your situation changes (for example updating your profile or republishing an opportunity).

16. Tips for success

What this page is

Short habits that improve results on PMTwin.

What you can do here

Apply these before you publish and while you collaborate.

Step-by-step actions

- Use clear titles and real skills.
- Set budgets and dates you can stand behind.
- Reply to matches and messages promptly.
- Keep your profile up to date.

Tips

Re-read your opportunity title and skills in the review step every time before you publish.

17. Common mix-ups

What this page is

Typical pitfalls and how to read them.

What you can do here

Use this list when results feel off—often the fix starts with profile or opportunity wording.

Step-by-step actions

- Empty profile — harder for others to trust or suggest good fits.
- Wrong “need” vs “offer” — you may see less relevant suggestions.
- Leaving everything in draft — nothing is visible to match.
- Ignoring notifications — you may miss a time-sensitive step.

Tips

If suggestions seem wrong, fix your profile first, then intent and skills on the opportunity, then publish again.

18. When something looks unclear

What this page is

Plain answers when a screen or outcome is confusing.

What you can do here

Match your situation to one of the notes below and follow the implied next step.

Step-by-step actions

- **Only some people accepted** — The suggestion stays open until everyone accepts, or someone declines.
- **No suggestions yet** — Adjust skills or timing, make sure you published, and check again later.
- **You declined** — That suggestion closes; you can focus on other posts or publish an updated opportunity.
- **Deal feels stuck** — Return to scope and dates in the deal, and message the other party.
- **Contract not moving** — Make sure each party has completed their signing steps.

Tips

Refresh the page or open the list view again if a screen did not update after you took an action.

19. Words you might see

What this page is

Short explanations in everyday language—no need to memorize anything.

What you can do here

Refer back when a label on screen is unfamiliar.

Step-by-step actions

- **Draft** — Saved but not live for others yet.
- **Published** — Your opportunity is visible so people can find it.
- **Match / suggestion** — A recommended pairing based on your post and someone else's.
- **Deal** — Where you manage the work after people agree to collaborate.
- **Contract** — The signed agreement that captures scope, payment, and timing.

Tips

The app may use slightly different wording in places; focus on whether something is saved, published, or signed.

End of guide — PMTwin
