 7. Tips for success
 8. Common mix-ups
 9. When something looks unclear
 0. Words you might see

Quick start (5 minutes)

1. Create your account.
2. Complete your profile.
3. Create your first opportunity.
4. Publish it.
5. Review your matches.
6. Accept a match to start working together.

The sections below walk through each screen in plain language.

1. Platform overview

• What this page is about

PMTwin helps professionals and companies find each other, agree on work, and track delivery—starting from an **opportunity** (what you need or offer), through **suggested matches**, then a **deal** and **contract** when you are ready.

• What you can do here

- Post what you need or what you offer.
- See suggestions that fit your post.
- Agree with others and manage the work in one place.

• Step-by-step actions

Use this guide in order, or jump from the table of contents to any topic.

• What happens next

Continue to the next section in order, or open any topic from the table of contents. The diagram below shows the typical path from sign-up to completion.

• Tips

- A complete profile helps others trust you.
- A clear opportunity gets better suggestions.

1.1 Who uses PMTwin

• What this page is about

People join as a **company** or as an **individual**. Individuals often choose **Professional** or **Consultant** depending on how they work.

• What you can do here

- **Company:** Represent your organization; post needs or offers on behalf of the business.
- **Professional:** Offer your skills and respond to opportunities.
- **Consultant:** Same idea, with a focus on advisory or expert services.

• Step-by-step actions

👉 What to do

1. After you sign in, open **Profile**.
2. Make sure your details match how you work (company vs individual).
3. Save if you changed anything.

• What happens next

Others will see your role type when you connect. You can update **Profile** later if your situation changes.

- **Tips**

If your organization reviews new accounts, you may need approval before everything is available.

2. Account & sign in

2.1 Registration

- What this page is about

The sign-up screens walk you through creating an account. You choose whether you are a **business** or an **individual**, then fill in the questions step by step.

Figure 1 — Registration.

- What you can do here

- Enter your email and a secure password.
- Add your name or company name and the details the form asks for.
- Accept the terms when asked.

- Step-by-step actions

What to do

1. Open **Register** from the welcome screen.
2. Choose company or individual and complete each step.
3. Click submit. If your organization reviews new accounts, wait for confirmation before everything is unlocked.

- What happens next

You can sign in once your account is active; watch your email or in-app messages for approval if your organization requires it.

• **Tips**

- Use an email you check often.
- Keep your password private.

2.2 Login

• **What this page is about**

The login page is where you enter your email and password to open PMTwin.

Figure 2 — Login.

• **What you can do here**

- Sign in with your email and password.
- Use **Forgot password** if you need to reset.

• **Step-by-step actions**

 **What to do**

1. Open

Login

.

2. Enter your email and password.

3. Click

Login

.

PMTwin — User Guide

- **What happens next**

You are redirected to your dashboard, where you can access Opportunities, Matches, and your Pipeline.

3. Profile

• What this page is about

Your profile is your public-facing introduction. It helps others understand **who you are** and **what you do** before they connect with you.

Figure 3 — Profile.

• Why it matters

A strong profile leads to clearer conversations and better suggestions when people compare your skills to their needs.

• Example (strong profile)

Example
Skills: Structural Engineering, AutoCAD, Revit
Experience: 8 years in construction projects
Certifications: PMP, PE License

• What you can do here

- **Skills** — what you actually deliver (be specific).
- **Experience** — years and roles that support your skills.
- **Certifications** — licenses or certificates that matter in your field.
- **Languages** — how you communicate.
- **Social links** — for example LinkedIn or a portfolio site.

• Step-by-step actions

What to do

1. From the side menu, open **Profile**.
2. Fill in or update the fields.
3. Save before you leave the page.

• What happens next

Your profile becomes visible to others and helps improve your matches.

• Tips

- Add 10–15 clear skills instead of one long vague list.
- Update your profile when your focus changes.

• Common mistakes

- Adding too few skills
- Using generic titles like "Engineer"
- Leaving the profile incomplete

4. Home (Dashboard)

• What this page is about

The home page is your starting point after login. It shows useful counts and shortcuts.

Figure 4 — Home dashboard.

• What you can do here

- See summaries of your opportunities, matches, applications, and alerts.
- Jump to common tasks from cards or the side menu.

• Step-by-step actions

👉 What to do

1. Use the **left menu** to go to Pipeline, Opportunities, Matches, Deals, Contracts, Notifications, or Profile.
2. Or tap a summary card on the home page if it takes you where you want to go.

• What happens next

You move to the screen you chose; counts on the dashboard refresh when you return to Home.

5. Opportunities

• What this page is about

An **opportunity** is your post: what you are looking for, what you offer, or both. When you **publish**, others can discover it and the system can suggest good fits.

Matching depends on clarity: clear skills, realistic budget, and timeline help you get better matches.

The screenshot displays the PMTwin 'Create Opportunity' form. On the left is a sidebar with the PMTwin logo, language toggles (AR, EN), a user profile for Layla Al-Qa... (CONSULTANT, ACTIVE), and a navigation menu under 'WORKSPACE' (Dashboard, Pipeline, People), 'OPPORTUNITIES' (Opportunities, Matches), and 'COLLABORATION' (Deals). The main area is titled 'Create Opportunity' with a subtitle 'Post a new collaboration opportunity' and a 'Fill Demo Data' button. A progress bar at the top shows seven steps: 1. Project Type (active), 2. Basic Info, 3. Intent, 4. Scope, 5. Collaboration, 6. Payment, and 7. Publish. Below the progress bar, 'Step 1: Project Type' is detailed with the instruction 'Choose whether this opportunity is for a single project or multiple / long-term collaborations.' It features a 'Project Type*' label and two selectable options: 'Single Project' (Standard one-time collaboration) and 'Multi Project' (Long-term or multiple collaborations (consortium, resource pooling)).

Figure 5 — Create opportunity.

• Example (good opportunity)

Example

Title: Need structural engineer for shop drawing review

Skills: Structural Engineering, AutoCAD

Budget: 5,000 – 10,000 SAR

Timeline: 2 months

• Common mistakes

- Using vague titles like "Need help"
- Not adding enough skills
- Unrealistic budget or missing timeline

5.1 Create opportunity — step by step

The form is a **wizard**: follow the steps at the top and use **Next** and **Back**. Fields marked with * are required.

Step 1 — Project type

- **What you select**

Single project (one clear piece of work) or Multi project (ongoing program or several related collaborations).

- **What it means**

It sets the tone—short engagement vs longer-term partnership.

Step 2 — Basic information

Title — Short, clear headline. **Description** — Enough detail that someone understands scope and expectations.

Location & how you work — Where work happens and whether it is on-site, remote, or hybrid. **Dates** (if shown) — Start, deadline, or end dates help others see timing.

Example

Field	Example
Title	Need structural engineer for shop drawing review
Skills (later step)	Structural Engineering, AutoCAD
Budget (later step)	5,000 – 10,000 SAR
Timeline	About 2 months

Tips: Use a clear title. Add real skills. Set a realistic budget and timeline.

Step 3 — Intent

Need — You are looking for something. **Offer** — You provide something. **Need + Offer** — Both apply (for example exchange-style setups).

What it means: It helps steer who should see your post and how suggestions are found.

Step 4 — Scope

Skills and tags — List what matters for delivery. Skills are important because they describe the work in words others search for.

Sectors and interests — Extra context so the right people notice your post.

Step 5 — Collaboration model

Choose the type of collaboration (for example project-style, partnership, hiring, or competition-style). Follow the questions and fill any extra fields that appear.

What it means: Different setups ask different follow-up questions so the form matches your situation.

Step 6 — Payment & value

Set your **budget range** and how value is exchanged (cash, equity, profit-sharing, barter, or a mix). This helps others see if the opportunity fits them.

Step 7 — Review & publish

Check everything. Then either **save as draft** (only you can see it) or **publish** (others can find it and suggestions can appear).

• Step-by-step actions

👉 What to do

1. Open
Opportunities
→
Create
.
2. Complete each wizard step.
3. On the last step, choose
Publish
when you are ready, or
save as draft
to keep working privately.

• What happens next

A published post can be discovered and matched; a draft stays visible only to you until you publish.

Note:

After publishing, the system automatically generates matches. Check the Matches page within a few minutes.

5.2 Draft vs publish (short)

- **Draft** — Work in private; nothing is visible for matching.
- **Publish** — Your post is live; others can discover it and you can receive suggestions.

• Common mistakes (draft vs publish)

- Choosing the wrong intent (need vs offer) for what you actually want.
- Leaving the opportunity in draft and expecting matches to appear.

6. Matches

• What this page is about

A **match** is a **suggested collaboration** based on your opportunity and another party’s opportunity. It is a starting point—not a final agreement.

Flow: Opportunity → Match → Deal → Contract

Figure 6 — Matches.

• What you see

- A **match score** — how closely the suggestion fits (higher usually means a better fit).
- The **other party** (or parties) and short context.
- The **type** of match and a **status** (for example waiting for responses, confirmed, or closed).

• Types of suggestions (plain language)

Type on screen	What it means
One-way	Your need lines up with someone’s offer (or the other way around).
Two-way / barter	Both sides exchange value in two directions (you give X, they give Y).
Consortium / group	Several roles or partners fit one lead opportunity.
Circular / chain	A ring of members where each step connects to the next.

• Typical status flow

- **Pending** — Waiting for each participant to accept or decline.
- **Confirmed** — Everyone accepted; you can move to a deal.
- **Declined** — Someone said no; the suggestion is closed.

- **What affects the score (plain language)**

Mainly: how well skills line up, whether budgets and timing make sense together, location and work mode, and trust signals when available. Small changes in your post can change the score.

- **What you can do here**

- Open a match to read details.
- Accept or decline.

- **Step-by-step actions**

 What to do

1. Open **Matches** from the menu.
2. Click a row to open the full match details.

- **What happens next**

You see the match detail screen where you can read the summary, compare scores, and choose your next action. When you **publish** an opportunity, suggestions are generated automatically in the background—refresh **Matches** after a short wait if the list is still empty.

- **Tips**

- If you see few or no suggestions, widen skills slightly or adjust budget and dates, then publish again.

- **Common mistakes**

- Ignoring the match score and context before accepting or declining.
- Declining without reading whether the fit is barter, chain, or simple pairing.
- Expecting new suggestions without adjusting a vague opportunity or unpublished post.

7. Match details

- What this page is about

This screen explains one suggestion: who is involved, what is being exchanged, and your choices.

Figure 7 — Match details.

- What you can do here

- **Accept Match** — You agree to move forward with this suggestion.
- **Decline** — You close this suggestion.
- **Message** or **Start negotiation** — When shown, use these to talk things through.

- Step-by-step actions

 **What to do**

1. From **Matches**, open a match.

2. Read the summary.

3. Click **Accept Match** or **Decline**.

4. Remember: everyone involved must accept before the next step.

- What happens next

If you declined, the suggestion closes. If you accepted, the match stays **pending** until every participant responds. When all accept, status becomes **confirmed** and a deal is created for the group.

Important:

A deal is only created when
all participants
accept the match.

8. Applications

- What this page is about

Some opportunities let people **apply** instead of only receiving automatic suggestions. Applications are **requests you send or receive** to join or bid on an opportunity.

- Matches vs applications (simple)

	Who starts it	When to use it
Suggestions (Matches)	The service suggests pairs for you	You want ideas based on your published post
Applications	A person applies to your post (or you apply to theirs)	You want formal inbound interest or you want to apply

- What you can do here

- Track applications on the Pipeline **Applications** tab.
- Move cards between columns when the page allows, to reflect review stages.

- Step-by-step actions

 **What to do**

1. Open

Pipeline

→

Applications

tab.

2. Move cards between columns when permitted.

- What happens next

Card positions reflect review stages; open a card or related opportunity when you need more detail.

9. From match to deal

- **What this page is about**

After everyone accepts a match, you move from “we might work together” to “let’s manage this in a deal.”

- **What happens**

When the last person accepts, **a deal is created automatically** for the group. Open it from **Deals** if you are not taken there directly.

- **Step-by-step actions**

 What to do

1. Complete acceptance on the match screen.
2. Open **Deals**.
3. Continue planning scope, timing, and next steps there.

- **What happens next**

A new deal appears for your group; you work there until milestones and contracts pick up the detail.

10. Deals

- What this page is about

The **deal** is where you manage the agreement: scope, timing, value, and progress. Think of it as your shared workspace for the collaboration.

Figure 8 — Deals list.

Figure 9 — Deal detail.

• What you can do here

- See who is involved and what was agreed in principle.
- Move through stages from discussion to signing and execution.
- Track deliverables and milestones (see next section).

• Stages (simple words)

- **Discussion** — Align on needs and terms.
- **Agreement** — Shape scope, value, and timeline.
- **Execution** — Do the work and track milestones.
- **Completion** — Close out when work is done.

• Step-by-step actions

👉 What to do

1. Open **Deals** and choose your deal.
2. Use the buttons and sections on the page to advance and update information.

• What happens next

The deal moves through discussion, agreement, signing, and execution as your group completes each stage. When ready, you move to the contract stage for signatures and proceed to the contract for signing.

11. Milestones

- **What this page is about**

Milestones break the work into steps with dates and deliverables. You manage them **inside the deal**—there is no separate milestones home page.

- **What you can do here**

- Add or review milestones (title, date, what must be delivered).
- Submit work for review when ready.
- Approve or ask for changes, depending on your role.

- **Step-by-step actions**

 What to do

1. Open your deal.
2. Find the milestones section.
3. Update or submit as guided on screen.

- **What happens next**

Statuses update as work moves from not started to submitted and approved (or sent back for changes).

- **Status words you may see**

- Not started → In progress → Submitted → Approved (or sent back for changes).

12. Contracts

• What this page is about

The **contract** is the official agreement between all parties. It records scope, payment, and timeline in one place.

Figure 10 — Contracts.

Figure 11 — Contract detail.

- **What you can do here**

- Read parties, scope, value, and dates.
- Complete signing steps when it is your turn.

- **Step-by-step actions**

 What to do

1. Open

Contracts

.

2. Select your contract.

3. Follow the signing prompts for your role.

- **What happens next**

Once signed, work continues under the deal. Once signed, the contract activates the deal execution.

13. Notifications

• **What this page is about**

Notifications keep you updated about matches, deals, contracts, and account messages—so you do not miss important steps.

Figure 12 — Notifications.

• **What you can do here**

- Read new updates.
- Open the related page from a notification when a link is provided.

• **Step-by-step actions**

 **What to do**

1. Open

Notifications

from the menu.

2. Tap an item to go to the related screen.

• **What happens next**

You land on the page tied to that notification (match, deal, contract, or message).

14. Pipeline

• What this page is about

The pipeline helps you **track your opportunities and applications** on boards. You can see what is draft, live, in progress, or closed at a glance.

Figure 13 — Opportunities board.

Figure 14 — Applications board.

• Opportunities columns (simple)

- **Draft** — Not published yet.
- **Published** — Live for others to find.
- **In progress** — Active discussion or negotiation.
- **Closed** — Finished on this board.

• Applications columns (simple)

Columns follow the review journey—for example pending, reviewing, shortlisted, in discussion, accepted, or not selected. Labels may vary slightly by screen.

• What you can do here

- Drag a card to another column when the page allows, to update its stage.
- Use this view together with **Matches** for suggestions (matches are not managed on this board).

• Step-by-step actions

What to do

1. Open **Pipeline**.
2. Switch between **Opportunities** and **Applications** tabs.
3. Drag cards only when you intend to change the stage shown.

- **What happens next**

Column labels update to reflect each item's stage; use **Matches** for suggestions (they are not managed on this board).

15. Your journey from start to finish

- **What this page is about**

A single checklist of the full path from signup to finishing work.

- **What you can do here**

Use it as a reminder or training checklist in order.

- **Step-by-step actions**

1. Create your account.
2. Fill in your profile.
3. Create an opportunity and save a draft if you need time.
4. Publish when you are ready.
5. Review matches and talk to others if needed.
6. Accept when everyone agrees.
7. Work in the deal and sign the contract when offered.
8. Complete milestones and close out.

- **What happens next**

Use this list as a checklist; revisit earlier steps whenever your situation changes (for example updating your profile or republishing an opportunity).

- **Tips**

You can return to any earlier step if your situation changes (for example updating your profile or republishing an opportunity).

16. Tips for success

- **What this page is about**

Short habits that improve results on PMTwin.

- **What you can do here**

Apply these before you publish and while you collaborate.

- **Step-by-step actions**

- Use clear titles and real skills.
- Set budgets and dates you can stand behind.
- Reply to matches and messages promptly.
- Keep your profile up to date.

- **What happens next**

Apply these habits before each publish and during collaboration; you should see clearer matches and fewer misunderstandings over time.

- **Tips**

Re-read your opportunity title and skills in the review step every time before you publish.

17. Common mix-ups

- **What this page is about**

Typical pitfalls and how to read them.

- **What you can do here**

Use this list when results feel off—often the fix starts with profile or opportunity wording.

- **Step-by-step actions**

- Empty profile — harder for others to trust or suggest good fits.
- Wrong “need” vs “offer” — you may see less relevant suggestions.
- Leaving everything in draft — nothing is visible to match.
- Ignoring notifications — you may miss a time-sensitive step.

- **What happens next**

When something feels off, work through profile wording, then opportunity intent and skills, then republish—most issues improve in that order.

- **Tips**

If suggestions seem wrong, fix your profile first, then intent and skills on the opportunity, then publish again.

18. When something looks unclear

- **What this page is about**

Plain answers when a screen or outcome is confusing.

- **What you can do here**

Match your situation to one of the notes below and follow the implied next step.

- **Step-by-step actions**

- **Only some people accepted** — The suggestion stays open until everyone accepts, or someone declines.
- **No suggestions yet** — Adjust skills or timing, make sure you published, and check again later.
- **You declined** — That suggestion closes; you can focus on other posts or publish an updated opportunity.
- **Deal feels stuck** — Return to scope and dates in the deal, and message the other party.
- **Contract not moving** — Make sure each party has completed their signing steps.

- **What happens next**

Follow the implied next step for your situation (refresh, adjust and republish, or complete signing in order).

- **Tips**

Refresh the page or open the list view again if a screen did not update after you took an action.

19. Words you might see

- **What this page is about**

Short explanations in everyday language—no need to memorize anything.

- **What you can do here**

Refer back when a label on screen is unfamiliar.

- **Step-by-step actions**

- **Draft** — Saved but not live for others yet.
- **Published** — Your opportunity is visible so people can find it.
- **Match / suggestion** — A recommended pairing based on your post and someone else's.
- **Pending** — The suggestion is open; not everyone has accepted yet.
- **Confirmed** — Everyone accepted; you can open or continue in a deal.
- **One-way / two-way / consortium / circular** — The shape of the suggestion (simple pairing, barter, group, or chain).
- **Deal** — Where you manage the work after people agree to collaborate.
- **Contract** — The signed agreement that captures scope, payment, and timing.

- **What happens next**

When a label on screen is unclear, match it to these meanings and continue with the task you were doing.

- **Tips**

The app may use slightly different wording in places; focus on whether something is saved, published, or signed.
