

OFFICIAL USER MANUAL

Complete User Guide

Construction Collaboration Marketplace for Saudi Arabia and the GCC

For end users, company owners, employees, administrators, trainers, and customers

Product	PM-Twin — Construction Collaboration Marketplace
Audience	End users, company owners, employees, administrators, sales teams, trainers, and customers
Purpose	Explain what you can see and do in PM-Twin
Region focus	Saudi Arabia and the GCC (Arabic layout, Saudi Riyal, VAT, data protection expectations)

Training environments: Some training or acceptance environments may provide sample login accounts and practice data. Features labeled **Preview** in the application are available in a limited form. Your trainer or customer success contact can confirm what applies to your environment.

1. Introduction

What is PM-Twin?

PM-Twin is a **construction collaboration marketplace** for Saudi Arabia and the GCC. It helps companies, project managers, consultants, contractors, suppliers, and independent professionals find partners, share capacity, negotiate terms, and formalize work through commercial agreements and contracts.

You publish what you need or what you can offer. PM-Twin helps you find compatible partners, then guides you from match → negotiation → commercial agreement → contract.

Why it exists

Construction projects rarely succeed with a single party. Teams need:

- Short-term capacity (schedulers, BIM coordinators, site supervisors)
- Equipment and resource sharing
- Joint bids and consortia
- Service-for-service exchange (barter)
- Hiring of professionals and consultants
- Clear commercial terms, VAT-aware pricing, and signed contracts

PM-Twin replaces fragmented chat threads, email RFPs, and informal introductions with a structured collaboration path.

Business problems it solves

Problem	How PM-Twin helps
Hard to find the right partner quickly	Marketplace discovery and automatic partner suggestions
Unclear scope and commercial terms	Guided opportunity form with collaboration models and commercial structure
No shared place for negotiations	Negotiation room with messages, offers, and history
Informal “handshake” deals	Commercial agreements with review and award
Missing legal closure	Contracts with multi-party signing
Incomplete profiles hurt trust	Readiness guidance before you publish
Company vs individual confusion	Personal and Company workspaces

Who should use it

- **Company owners** building partnerships and subcontracting pipelines
- **Employees** working inside a company workspace
- **Individual professionals and consultants** offering or seeking work
- **Commercial, legal, and project managers** reviewing terms and contracts
- **Platform administrators** reviewing accounts and overseeing the marketplace
- **Sales and training teams** onboarding customers

Typical users

Persona	Typical goals
Contractor company owner	Publish needs for subcontractors; award commercial agreements
BIM / design consultant	Publish offers; accept matches; negotiate cash or barter
Developer / owner-client	Form consortia or joint ventures for large packages
Equipment provider	Share fleet capacity through resource-sharing models
Independent project manager	Hire into roles or offer availability
Platform admin	Approve registrations, manage awards, review activity

2. Platform overview

PM-Twin is organized around two everyday ways of working:

Area	How to think about it	Typical language
My Workspace	Your work, ownership, and progress	My opportunities, pending, needs action, executing
Marketplace	Finding partners and opportunities	Explore, discover, available, recommended

Major modules

Module	What it is	Where you find it
Dashboard	Home for your active workspace: summary numbers, tasks, notifications, next actions	My Workspace → Dashboard
Workspace	Your Personal or Company business context (switchable)	Workspace switcher in the header
Marketplace / Discover	Browse published opportunities, people, and (where available) matches	Marketplace → Discover
Opportunities	Create, edit, publish, and manage needs and offers	My Opportunities / Browse Opportunities
Matches	Suggested partner pairings	My Matches
Negotiations	Term discussions, offers, and counter-offers	My Negotiations
Commercial Agreements	Structured business agreements after terms are agreed	My Commercial Agreements
Contracts	Formal agreements ready for signing	My Contracts
Pipeline	Board view across matches → agreements → contracts	My Pipeline
Notifications	Alerts for matches, invitations, agreements, contracts	Notifications
Messages	Messaging area	Messages
Profile	Your personal or company profile and readiness	Profile
Party documents	Documents for account review and compliance (CR, VAT, licenses, and similar)	Party documents
Settings	Language direction, password, and related preferences	Settings
Admin Portal	Platform operations for administrators	Admin

Screenshot: Sidebar showing My Workspace and Marketplace groups

How modules work together

1. You complete a **profile** and work in a **workspace**.
2. You create and **publish** an **opportunity** (Need or Offer).
3. The **marketplace** shows published posts to others.
4. Compatible partners appear as **matches**.
5. Parties **accept** a match and start a **negotiation**.
6. When terms are agreed, you create a **commercial agreement**.
7. From the agreement you create and **sign** a **contract**.
8. Work moves through execution statuses until **completed**.

3. Core concepts

Workspace

A **workspace** is the business context you are acting in. You may have:

- A **Personal Workspace** (individual professional or consultant)
- One or more **Company Workspaces** (as owner, admin, member, or viewer)
- Platform staff may also enter the **PM-Twin Platform** admin area

Switching workspace changes what “mine” means for opportunities, matches, and agreements.

Company

A **company** is an organization with its own company workspace. Owners invite employees. Some collaboration options (for example Project-Specific Joint Venture, Special Purpose Vehicle, Strategic Joint Venture) are available only to companies.

Personal Workspace

A **Personal Workspace** is for professionals and consultants working independently. You can still collaborate with companies through matches and negotiations.

Party

A **party** is who participates in the marketplace: either an **individual** or a **company**. Opportunities, matches, and contracts are always linked to the parties involved.

Opportunity

An **opportunity** is a draft or published **Need** or **Offer** describing scope, collaboration model, commercial terms, and timeline. In simple terms: a need or offer ready for partners to find.

Match

A **match** is a suggested pairing between compatible opportunities (including multi-party collaborations). Matches show a score and a status such as Discovered, Accepted, Confirmed, Declined, or Expired.

Negotiation

A **negotiation** is the structured discussion of commercial terms after a match is accepted. It includes messages, offers, counter-offers, attachments, and a history of actions.

Commercial Agreement

A **commercial agreement** is the business record created once terms are agreed (or awarded). It moves through statuses such as Draft, Review, Signing, Executing, Completed, or Cancelled. It sits between negotiation and contract.

Older materials may say “deal.” In the product, the preferred name is **Commercial Agreement**.

Contract

A **contract** is the formal signing record created from a commercial agreement. Parties sign it; when all required signatures are in place, it becomes **Active**.

Readiness

Readiness is a percentage score that shows whether your **profile** and **opportunity** are complete enough to publish. Publishing usually requires both to be ready: required information filled in and a score of **80%** or higher.

Validation

While you fill forms, PM-Twin highlights missing or incomplete information (for example required fields, or a payment schedule that does not add up to 100%). Warnings help you improve quality; required items must be fixed before you can publish.

Marketplace

The **marketplace** is where you discover other people's published opportunities, companies, and professionals. Your drafts stay under **My Opportunities**, not in public discovery.

Ownership

Ownership answers "whose is this?"

Label	Meaning
Mine	Created by you in your personal context
Company	Owned by your company workspace
Marketplace	Published by others outside your organization

Visibility

Visibility controls whether an opportunity appears in marketplace discovery. **Archive** removes it from active discovery. **Close** ends the opportunity for new matching.

4. User roles

Your access depends on how you registered, which workspace you are in, and (for staff) whether you are a platform administrator.

Individual Professional (and Consultant)

Who: Registered with a Personal Workspace as Professional or Consultant.

Can typically:

- Complete personal profile and documents
- Create opportunity drafts and publish when readiness and permissions allow
- Browse the marketplace, view matches, accept or decline matches
- Start and participate in negotiations (message, offer, counter, accept)
- View commercial agreements and sign contracts when you are a signing party

Cannot typically:

- Create a company without registering as Company
- Use company-only collaboration options (Project Joint Venture, Special Purpose Vehicle, Strategic Joint Venture)
- Access the Admin Portal

Company Owner

Who: Registered a Company Workspace and is the **owner**.

Can typically:

- Manage the full opportunity journey for company posts
- Invite and manage employees (according to company permissions)
- Accept matches, negotiate, and create or progress commercial agreements
- Award agreements (where permitted) and create or sign contracts
- Complete company profile and review documents (Commercial Registration, VAT certificate, and similar)

Employee

Who: Joined a company through an invitation. Does **not** create a new company.

Can do: Depends on the role assigned in the company workspace. Examples:

Role	Typical focus
Company admin	Members, workspace settings, broad operational rights
Manager / Project manager	Opportunities and delivery coordination
Commercial manager	Negotiations, agreements, awards
Legal / Finance	Review, signing, commercial terms
Member	Day-to-day collaboration within granted permissions
Viewer	View only

Cannot: Act outside the company workspace they belong to, or perform actions their role does not allow (for example publishing, signing, or awarding).

Reviewer

Who: Assigned to review new registrations (often platform staff).

Can: Review registration packages, request clarification, approve or reject accounts.

Cannot: Act as a normal marketplace participant unless they also have a standard user account.

Administrator (platform staff)

Who: Platform administrators, operations staff, moderators, auditors, and similar roles.

Can: Use the Admin Portal — users and companies, account review, marketplace oversight, commercial approvals and awards, reports, and activity review.

Auditors: May view information without changing records.

Screenshot: Role badge in the sidebar (for example “Professional” or “Platform admin”)

5. Getting started

Logging in

1. Open **Sign in**.
2. Enter your **email** and **password**.
3. Optionally choose to stay signed in.
4. After sign-in you land on your dashboard (personal or company).

Screenshot: Sign in page

Tip for training sessions: Your trainer may provide practice accounts.

New users: Use **Register** to create a Personal or Company workspace, complete the profile steps, accept Terms and Privacy, and verify your email. New accounts may be **pending review** — you can browse, but full actions unlock after approval.

Switching workspaces

1. Open the **workspace switcher** in the header.
2. Choose **Personal Workspace** or a **Company Workspace**.

- 3. You are taken to the matching dashboard for that workspace.
- 4. Platform staff may choose **enter Platform** to open Admin.

Updating your profile

- 1. Go to **My Profile**.
- 2. Review Summary, Skills, Experience/Portfolio, and (for companies) Company information.
- 3. Improve **profile readiness** until required fields are complete and the score reaches the publish threshold.

Individual — required for readiness: Full Name, Role, Skills, Services, Location, Availability.

Individual — recommended: Portfolio, Experience, Certifications, Previous Projects.

Company — required: Company Name, Business Category, Services, Project Categories, Location, Contact Person.

Company — recommended: Portfolio, Team Size, Coverage Areas, Certifications, Financial Capacity.

Completing company information

- 1. Ensure you are in the **Company Workspace**.
- 2. Complete company profile fields and contact person.
- 3. Upload required documents under **Party documents** (see below).
- 4. If your account is pending review, follow the guidance on the pending dashboard (for example Upload VAT, Upload CR, Resubmit for review).

Uploading required documents

Open **Party documents**.

Document categories you may see	Common required items
Profile, vetting, legal, technical, commercial, financial, insurance, certification, attachment	Commercial Registration, VAT Certificate , Insurance Certificate, License, National ID

Understanding dashboard widgets

See [Section 13 — Dashboard guide](#). At a glance you will see:

- Greeting and readiness / active matches
- Summary counts (opportunities, matches, negotiations, agreements, contracts)
- My tasks and next best actions
- Notifications
- Matching summary and marketplace recommendations

If your account is **pending review**, you see a **Pending Vetting Dashboard** instead of the full workspace dashboard.

6. Complete opportunity guide

This is the most important section for most users.

What is an Opportunity?

An opportunity is a structured post that says either:

- **Need** — you are requesting services, skills, resources, capacity, or project support; or
- **Offer** — you are providing services, skills, resources, equipment, or available capacity.

Opportunities include collaboration model, scope, commercial structure, timeline, and documents so partners can evaluate fit.

When should you create one?

Create an opportunity when you have a real collaboration intent, for example:

- You need a concrete pumping subcontractor next month
- You can offer BIM coordination capacity
- You want partners for a consortium bid
- You need to hire a senior project manager for six months
- You want to exchange design capacity for site supervision (barter)

Do **not** publish empty placeholders — readiness and partner quality depend on complete information.

Draft vs Published

State	Meaning	In the marketplace	Partner suggestions
Draft	Work in progress; use Save Draft	Not shown as published	Not created yet
Published	Live for discovery	Visible according to ownership and visibility	Created after you publish

If you leave the form with unsaved work, you may see **Recover unsaved local draft?** with options to **Continue draft** or **Discard**. Always use **Save Draft** or **Publish Opportunity** when you want to keep your work.

Opportunity lifecycle

Statuses you will see: **Draft** → **Published** → **Matched** → **Negotiating** → **Contracted** → **Executing** → **Completed** (or **Cancelled**).

Archive removes the opportunity from active marketplace discovery. That is different from cancelling or closing the opportunity.

Screenshot: Opportunity details header with status badge and journey strip

Step-by-step creation

1. From the Dashboard, click **Create Opportunity**.
2. Complete the five wizard steps below.

- 3. Use **Save Draft** anytime.
- 4. On **Review & Publish**, resolve readiness items, then click **Publish Opportunity**.

Screenshot: Opportunity Wizard - Step 1

Screenshot: Opportunity Wizard - Step 2

Screenshot: Opportunity Wizard - Step 3

Screenshot: Opportunity Wizard - Step 4

Screenshot: Opportunity Wizard - Review & Publish

Wizard steps:

Step	Label	Purpose
1	Opportunity	Post type and basics
2	Collaboration	Model and sub-model
3	Scope & Work	Requirements and packages
4	Commercial Structure	How value is exchanged
5	Review & Publish	Confirm and publish

Messages you may see before continuing:

- “Choose Need or Offer before continuing.”
- “Add a title and description before continuing.”
- “Select a collaboration model and sub-model before continuing.”

Step 1 — Opportunity (basics)

On-screen help: *Start with the post type and the basics partners need to evaluate fit.*

Post Type (required to continue)

Option	Purpose	When to use
Need	Request capacity	You are looking for services or resources
Offer	Provide capacity	You are providing services or resources

Common mistake: Choosing Offer when you are actually hiring — use Need (or the Hiring collaboration model) when you are requesting people.

Basic Information

Field	Required?	Purpose	Best practice	Common mistake
Title	Required	Clear name partners can find	Specific: “BIM Coordination — Riyadh Tower Q3”	Vague titles like “Project help”
Short description	Required	Partner evaluation	2–4 sentences on scope and outcome	Pasting a full RFP with no summary
Category or profession	Required	Discovery by sector	Align with the real trade or discipline	Leaving unrelated category
Target role	Required	Who should respond	“MEP Subcontractor”, “Planning Engineer”	Leaving blank or too broad
Primary location	Required	Location fit	City and site context	“KSA” only when city matters

Field	Required?	Purpose	Best practice	Common mistake
Service area	Optional	Coverage	Regions you serve or need covered	Ignoring multi-city coverage
Start date	Required	Timing	Realistic start	Past dates without explanation
Deadline	Optional	Tender or delivery cutoff	Use for RFPs and hard ends	Conflicting with start date
Availability end date (recommended)	Recommended	Offer capacity window	Especially important for Offers	Omitting when capacity is time-bound

Step 2 — Collaboration Model

On-screen help: Choose how parties will work together. Matching structure is shown automatically.

Main Collaboration Model (required)

Model	Meaning	Example
Cash Subcontracting	Engage another party to deliver defined work for payment	Concrete pumping subcontract
Service Exchange / Barter	Exchange complementary services without pure cash	Design capacity for site supervision
Joint Venture	Partner for a shared project or business outcome	Special Purpose Vehicle for a mixed-use bid
Resource Sharing	Share equipment, people, or materials	Shared crane fleet
Hiring / Professional Engagement	Hire a professional or consultant	Senior project manager for 6 months

Sub-model (required)

Pick the engagement pattern under the main model. Examples:

Main model	Sub-models (examples)
Cash Subcontracting	Task-Based Engagement; Competition / RFP
Service Exchange	Long-Term Strategic Alliance; Mentorship Program; Task-Based Engagement
Joint Venture	Consortium; Project-Specific Joint Venture; Special Purpose Vehicle; Strategic Joint Venture
Resource Sharing	Bulk Purchasing; Equipment Sharing; Resource Sharing & Exchange
Hiring	Professional Hiring; Consultant Hiring

Company-only: Project-Specific Joint Venture, Special Purpose Vehicle, and Strategic Joint Venture require a **company** account.

Each sub-model shows additional **Collaboration Details** (for example Task Title, Equity Split, Equipment Type). Complete required fields before publishing.

Recommended matching structure (read-only)

The screen shows **Recommended matching structure** (One Way, Two-Way, Consortium, or Circular). You do not choose this manually — it appears based on the collaboration and commercial choices you made. Use **Why?** if you want a short explanation.

Step 3 — Scope & Work

On-screen help: Define requirements, work packages, tasks, deliverables, and milestones.

Skills

Field	Purpose	Required?	Tips
Skills Required / Skills Offered	Better partner fit	Needed for strong readiness	Add level, years, certification, and mandatory flags where relevant
Skill name	Specific skill	Per skill entry	For example "BIM Coordination"

Common mistake: Listing only soft skills or one vague skill.

Services

Enter **Services Required** or **Services Offered** (needed for strong readiness), usually as a comma-separated list.
Example: Design Review, Coordination.

Qualifications & partner preference

Field	Required?	Purpose
Preferred partner type	Recommended	Company, individual, or consultant preference
Experience level	Optional	Seniority expectation
Certifications	Optional	Compliance and trust
Team size	Optional	Capacity expectation
Minimum qualifications	Optional	Minimum standards for responders

Resources

People, equipment, vehicles, materials, software, licenses — optionally linked to a work package.

Field	Notes
Type	People, equipment, vehicles, materials, software, licenses
Name	Required for each resource
Quantity / Unit / Availability	Clarity for partners
Work package	Whole opportunity or a specific package
Mandatory	Checkbox

Available capacity (Offer only): Available, Reserved, and Maximum capacity, plus Available from. This helps partners understand your capacity.

Work Packages

Break delivery into manageable units:

1. Click **Add Work Package**.
2. Enter package title and description/scope.
3. Add **Tasks** and **Package deliverables**.
4. Set package dates as needed.

Best practice: Add at least one clear package for anything beyond a very small task.

Deliverables (opportunity-level)

Add deliverables with title and acceptance criteria. Scope can be the entire opportunity or a work package.

Milestones

Add milestones with completion criteria and optional **Payment trigger** — important when you use cash payment schedules.

Timeline & Location

Context	Typical fields
Need	Location, Start date, Deadline
Offer	Preferred location / service area, Availability from
Additional timeline options	Flexible start, Weekend allowed, Must finish before, Estimated duration, Working days, Shift type

Attachments & compliance

Field	Purpose	Best practice
Attachments	Document names	List SOW, drawings, and BOQ names clearly
Compliance requirements	Codes, licenses, H&S, data protection	Be explicit for KSA projects
Portfolio references	Proof of capability	Reference similar prior work

Step 4 — Commercial Structure

On-screen help: *Configure one or more value exchange components. Hybrid is shown automatically when more than one is selected.*

Enable one or more: **Cash, Barter, Profit Sharing, Revenue Sharing, Equity, Custom**. If more than one is enabled, the mode becomes **Hybrid**.

Cash (Saudi Riyal)

Field	Purpose	Tips
Currency	Usually SAR	Keep consistent across the schedule
Budget type	Fixed, Range, Rate-based, Milestone-based, To be negotiated	Match how you really buy or sell
Fixed amount	Monetary value	Align with milestones
Advance % / Retention %	Cash flow and quality holdback	Common in KSA construction
Payment terms	When payment is due	Align with deliverables
VAT handling	Tax treatment	Be explicit; standard VAT in KSA is 15%
Bank guarantee	Security instruments	Use when contractually required
Payment schedule	Milestones with % or amount	Percentages should total 100%

Barter

Offered asset or service, requested asset or service, valuation method, estimated value.

Profit / Revenue / Equity / Custom

Share percentages, calculation basis, settlement, equity type, exit strategy, or custom calculation method.

Allocation & constraints

When multiple components are enabled, set allocation method (Percentage, Fixed, Mixed, Not applicable) and optional commercial constraints (for example budget ceiling).

Common mistakes:

- Enabling Cash with empty amounts and “to be negotiated” everywhere — lowers readiness
- Payment schedule percentages that do not total 100%
- Barter without valuation

Step 5 — Review, Readiness, Validation, Publishing

Review shows an **executive summary** and section cards with **Edit** links:

- Opportunity Summary
- Collaboration
- Scope and Requirements
- Work Packages and Tasks
- Commercial Structure
- Timeline and Location
- Documents and Compliance

Readiness

You can publish when:

1. Your **profile** is ready (required fields complete and score at least **80%**), and
2. Your **opportunity** is ready (required fields complete and score at least **80%**)

Blocked message example: *Complete your profile and opportunity details before publishing for matching.*

Required items may include: title; Need or Offer; category; target role; skills; services; location; start or availability; collaboration model; description; commercial terms.

Recommended improvements (optional, but raise your score): preferred partner type, portfolio or documents, compliance, delivery milestones.

Publishing

1. Resolve required readiness items.
2. Click **Publish Opportunity**.
3. Status becomes **Published**.
4. Compatible partners may appear as matches, and you may receive notifications.

Editing, duplicating, closing, archiving, awarding

Action	When available	Effect
Edit	Owner; not archived or closed	Update draft or published content
Publish	Owner; draft; readiness complete	Enter the marketplace; partner suggestions appear
Duplicate as Draft / Template	Owner	New draft copy
Archive	Owner; not draft or already archived	Removed from active marketplace discovery
Close Opportunity	Owner; not draft, closed, or archived	Ends the opportunity for new matching
Delete Draft	Owner; draft only	Permanently deletes the draft
Export PDF / JSON , Print, Share, Copy Link	Owner	Sharing and records

Awarding is not an opportunity button. You award from **Commercial Agreements** or Admin **Award Management** when several agreements compete on one opportunity.

Opportunity detail tabs include: Overview, Scope & Work, Commercial, Marketplace, Matching, Documents, Related, History.

Realistic example (start to finish)

Scenario: A Riyadh contractor needs BIM coordination for a tower fit-out (cash subcontract, task-based).

1. Sign in as company owner → Company Workspace.
2. Profile readiness at least 80%; VAT certificate and Commercial Registration uploaded.
3. **Create Opportunity** → Post Type **Need**.
4. Title: "BIM Coordination Support — Tower Fit-out, Riyadh".
5. Category: Construction / BIM; Target role: BIM Coordinator; Location: Riyadh; Start date set.
6. Collaboration: **Cash Subcontracting** → **Task-Based Engagement**; fill task title, scope, duration, skills, experience, payment terms.
7. Scope: Skills Required = BIM Coordination (Expert); Services = Clash Detection, Model Coordination; one work package "Coordination Package"; milestones with payment triggers.
8. Commercial: Cash, SAR, Fixed amount, Advance 20%, Retention 5%, VAT handling clear, schedule totaling 100%.
9. Review → readiness complete → **Publish**.
0. Matches appear → accept the best match → **Start negotiation** → agree terms → **Create Commercial Agreement** → **Create contract** → parties **Sign** → contract **Active**.

7. Marketplace guide

Browsing opportunities

1. Open **Marketplace** → **Discover** for the discovery home (summary numbers and explore-by-model links), or
2. Open **Browse Opportunities**.

Tabs commonly include:

- **All Marketplace** — published posts from others
- **My Opportunities** — yours
- **Company Opportunities** — your organization's

Screenshot: Marketplace opportunity list with ownership badges

Filters and search

Control	Typical options
Search	"Search available opportunities..." / "Search my opportunities..."
Status	All / Published / Draft / Negotiating
Main collaboration model	Cash subcontracting, service exchange, joint venture, resource sharing, hiring
Exchange mode	Cash, Barter, Profit-Sharing, Equity, Hybrid
Match type	One Way, Two-Way, Consortium, Circular

Cards and details

Cards show ownership, Need or Offer, status, and a primary action. Open a card to view details. Some previews may show limited detail until verification is complete.

Saving opportunities

There is currently **no bookmark or save-for-later**. Use Matches, Pipeline, or Notifications to track what matters.

Marketplace rules and visibility

- Only **published** opportunities appear in marketplace discovery.
 - **Drafts** remain under My or Company tabs.
 - **Archived** posts are removed from active discovery.
 - **Browse Matches** and **Map** may be labeled **Preview**.
 - Use **Browse Companies** or **Browse Professionals** to explore people and organizations.
-

8. Matching guide

What matching is

After you **publish** an opportunity, PM-Twin suggests compatible partners. Each **match** shows a **match score** and fit areas such as Skill match, Timeline fit, and Location fit.

When it happens

Partner suggestions appear after you publish. You will see them under **My Matches**, in recommended areas on the dashboard, and in notifications such as **New match found**.

Types of matching

Type	Label you see	Meaning
One Way	One Way Matching	A Need paired with Offers (or an Offer with Needs)
Two-Way	Two-Way Dependency (Barter)	Each side has both a need and an offer
Consortium	Group Formation	A lead Need fulfilled by several partner Offers
Circular	Circular Exchange	A ring of three or more parties (A → B → C → A)

The type is shown automatically from your collaboration choices — you do not select it yourself.

What to expect after a match appears

- 1. You receive a notification: **New match found.**

- 2. Open **My Matches** and filter by **Discovered**.
- 3. Review score, confidence (High / Medium / Low), related opportunities, and participants.
- 4. Choose **Accept** or **Decline**.
- 5. When the match is ready, click **Start negotiation**.

Statuses you may see: **Discovered** → **Accepted** → **Confirmed**, or **Declined**, **Expired**, or **Superseded**.

Screenshot: Match detail with score and Accept / Decline actions

9. Negotiation guide

Starting negotiations

- 1. Accept the match.
- 2. Click **Start negotiation**.
- 3. Open the negotiation room.

Negotiation room tabs

Tab	Use it for
Overview	Status, mode, and linked match, commercial agreement, and contract
Discussion	Send messages
Offers & Counter Offers	Amounts in SAR; submit, accept, or reject
Commercial Terms	Structured terms
Attachments	Supporting files
Audit Trail	History of actions

Screenshot: Negotiation room — Offers & Counter Offers tab

Messages, offers, and counter-offers

- **Send message** in Discussion.
- Enter **Offer amount (SAR)** → **Submit offer** or **Submit counter offer**.
- **Accept** an offer → negotiation becomes **Agreed**; other open offers may be rejected.
- **Reject** an offer → negotiation can continue.

Header actions may include **Agree terms**, **Cancel negotiation**, **Create Commercial Agreement**, **Submit proposal**, and **Accept updated proposal**.

Statuses

Statuses you may see: **Active**, **Countered**, **Agreed**, **Expired**, **Cancelled**.

Example conversation

Contractor (Need): “We can accept 185,000 SAR including VAT handling as discussed, 20% advance, 5% retention.”
BIM firm (Offer): Submits offer **185,000 SAR**.
Contractor: Accepts offer → confirmation: “Offer accepted — negotiation agreed”.
Next: Create Commercial Agreement → Create contract.

Cancelling and history

- **Cancel negotiation** sets status to Cancelled.
 - Use **Audit Trail** and list filters (Active, Countered, Agreed, Cancelled, Expired) for history.
-

10. Commercial Agreement guide

Why it exists

A commercial agreement turns agreed negotiation terms into a clear business record with participants, commercial terms, and a status path for review, signing readiness, execution, award, and completion — alongside the legal contract.

Relationship with negotiations

Typical path: **Match accepted** → **Negotiation agreed** → **Create Commercial Agreement**. Linked records show the related match and negotiation, and later the contract.

Statuses and approval process

Button	New status
Submit for review	Review
Move to signing	Signing
Start execution	Executing
Mark completed	Completed
Cancel commercial agreement	Cancelled

Review and award

- The detail page shows participants, commercial terms, and recommended actions (**Create contract**, **Review negotiation**).
- **Award commercial agreement** (where permitted): the winner moves toward signing; other competing agreements may be rejected or cancelled; a contract may be created.
- Admin **Award Management** lists opportunities that have multiple competing agreements.
- Admin **Approvals** lists agreements awaiting review-related attention.

Rate participants

From a commercial agreement, open **Rate participants**. Criteria include Communication, Quality, Timeliness, and Collaboration. Click **Submit review** when finished.

Screenshot: Commercial agreement detail with status actions

11. Contract guide

How contracts relate to commercial agreements

Contracts are created **from** a commercial agreement using **Create contract**. The contract page links back to the agreement, match, negotiation, and related Need or Offer.

Creating, reviewing, signing, activating, completing, closing

Step	User action	Result
Create	Create contract from the agreement	Draft contract; notification Contract created
Review	Open the contract	Check parties, payment schedule, and links
Sign	Sign contract	Your signature is recorded; when everyone has signed → Active
Complete	Complete contract	Status Completed
Terminate	Terminate contract	Status Terminated

List filters: Draft, Pending signature, Active, Completed, Terminated.

Note: In some training environments, contract file upload may not be available yet. Follow on-screen guidance.

Screenshot: Contract parties and signatures panel

12. Notifications

Open **Notifications**. Filter All / Unread / Read. Groups: **Today**, **Yesterday**, **Earlier**.

Notification types and actions

Notification	Meaning	What you should do
New match found	A partner was suggested	Open the match → review → Accept or Decline
Match accepted	A participant accepted	Wait for confirmation or continue
Match confirmed	All required parties accepted	Start negotiation
Match declined	A participant declined	Review other matches
Negotiation started	Discussion room opened	Open negotiation → respond
Commercial Agreement created	Agreement created from your collaboration	Review terms → move to the next status
Contract created	Contract drafted from the agreement	Review → Sign contract
Invitation received	Invited to a company workspace	Open the invitation and accept
Invitation accepted	Invitee accepted	Activate membership if you are owner or admin
Membership activated	Company membership is active	Switch to the company workspace
Workspace activated	Full collaboration unlocked	Create and publish opportunities
Opportunity creation enabled	Posting unlocked after account review	Create opportunity
Registration submitted / Resubmission	Onboarding package sent	Wait for the reviewer
Account approved	Review complete	Complete profile; start collaborating
Account rejected / suspended	Onboarding failed or suspended	Read the reason; contact support or clarify
Clarification requested	Reviewer needs more information	Upload documents or respond
Review received / Document replaced	Document activity	Check Party documents
Review overdue	Account review is overdue	Respond immediately

The dashboard card **My notifications** shows the latest items with **View all**.

13. Dashboard guide

Screenshot: Workspace dashboard summary strip and tasks

Header

- Greeting ("Good morning, ...")
- **Profile readiness** or **Active matches** highlight
- Primary action: **Create Opportunity**
- Secondary action: **My pipeline**

Summary strip

Item	Meaning
My opportunities	Your posts in this workspace
My matches	Matches involving you
My negotiations	Active term discussions
My commercial agreements	Your agreements
My contracts	Your contracts

My tasks

Actionable items such as:

- Review new match → **Open match**
- Respond to negotiation → **Open negotiation**
- Agreement in review or signing → **Open commercial agreement**
- Draft ready to publish → **Open opportunity / Edit**

Next best actions and workspace health

Prioritized recommendations and, when available, a workspace health view that explains what needs attention.

My workflow

Active negotiations and agreements; link to **Open pipeline**. Empty state: “No active workflow items”.

Blocked — needs decision

Items that need a decision from you (for example a match that needs replacement). Resolve these so work can continue.

My matching summary

Counts by type: One Way, Two-Way, Group Formation, Circular Exchange.

Recommended from marketplace

Suggested match cards; browse further matches from here.

Executive intelligence snapshot

Summary views for Portfolio readiness, Funnel conversion, Risk blockers, and Execution health.

Pending vetting dashboard

Shown instead of the full dashboard until registration is approved. Follow upload and resubmit guidance.

14. Admin portal (overview)

For platform administrators only. This section describes what administrators can do in the application.

Screenshot: Admin Command Center home

Command Center

Page	Purpose
Executive	Overall operations home

Page	Purpose
Operations	Day-to-day operational queues
Risk & Compliance	Risk-oriented views
My Queue	Work assigned to you
Admin Inbox	Admin messages and items

Identity and onboarding

- **Users, Parties, Memberships, Roles** — manage who can act
- **Onboarding Center / Vetting** — New Registrations, Pending Review, Clarifications, Approved, Rejected, Suspended
- Activate workspaces and enable opportunity creation after successful review

Marketplace management

- Opportunities, Matching, Matches, Matching Quality, Taxonomy, Moderation

Commercial operations

- Negotiations, Commercial Agreements, **Approvals, Award Management**, Contracts, Legal Review

Reports

Reporting views for platform performance.

Audit, environments, and settings

Area	Purpose
Audit	Review important activity
Environments	Training tools to restore or exchange practice scenarios; includes the Demo Walkthrough panel (cast-coverage badges and login-as steps for all four matching topologies)
Health and data quality	Platform status checks (including cast coverage and topology chain checks in Demo/UAT)
Settings	Commercial defaults such as currencies and VAT rate % (default 15)

Some configuration areas (for example Skills, Site content, Subscriptions, Disputes, Vetting Config) may appear as coming soon or limited.

Demo Walkthrough verification (Demo/UAT)

Use this checklist after seeding or before a customer training session. It confirms matching demos, demo-account casting, ownership rules, and environment reset.

Procedure

1. Sign in as admin

Email: `admin@pmtwin.com` · Password: `admin123` .

2. Open Environments

Go to `/admin/environments` .

3. Confirm cast coverage

On the **Demo Walkthrough** panel, confirm the Cast Coverage badge is complete (for example `cast 63/63`) and that there are **no missing account IDs**.

Optionally open Admin **Health** and confirm `cast_coverage` and each `topology_chain_*` check are healthy.

4. Walk each matching topology

In **Demo Walkthrough**, open each scenario that covers the four topologies (`one_way` , `two_way` , `consortium` , `circular`) — for example Cash Subcontracting, Two-Way Barter, Joint Venture (Consortium), Circular Resource Sharing, and/or Marketplace. For every narrative step:

- Use **Copy credentials** for the listed account.
- Sign out, then sign in again with the correct account type (**Individual** or **Company**).
- Open the step deep link.
- Confirm the correct entity loads (opportunity, match, commercial agreement, or contract) and is visible to that role.

5. Employee ownership check

Sign in as one employee, for example `fahad.alotaibi@alriyadh-construction.test` / `Pmtwin@2026` (Individual login).

Open their cast match or employer-hosted opportunity.

Confirm ownership is the **employer company** workspace/party (company-owned opportunity under the company workspace), not a personally owned company opportunity.

6. Pending account check

Sign in as a Pending tab account, for example `noura.pending@pmtwin.test` / `Pmtwin@2026`.

Confirm their opportunity remains a **draft** and that **publishing is blocked** until onboarding is approved.

7. Admin is not a marketplace participant

Confirm `admin@pmtwin.com` is the walkthrough host only. The admin account must **not** appear as a need/offer counterparty on commercial marketplace post-matches. Admin presence is through Environments, notifications, and vetting — not marketplace participation.

8. Reset and re-check

Return to `/admin/environments` as admin. Run **Reset Entire Environment** and confirm the dialog.

Re-open **Demo Walkthrough** and confirm Cast Coverage is complete again and showcase deep links restore correctly.

Pass criteria

Check	Expected result
Topology chains	All four (<code>one_way</code> , <code>two_way</code> , <code>consortium</code> , <code>circular</code>) show complete
Cast coverage	All demo accounts cast (no missing account IDs)
Deep links	Each walkthrough step opens the correct entity for that role
Employee	Opportunity ownership is company-scoped under the employer
Pending	Draft visible; publish blocked until approval
Admin	Not listed among marketplace match counterparties
Reset	Seed and walkthrough state restore after environment reset

Demo account passwords and suggested logins are listed in `POC/docs/DEMO_CREDENTIALS.md` and on the login **Demo accounts** dialog.

15. Complete business journey

End-to-end walkthrough of a typical successful path.

Step-by-step screens and actions

1. Company Registration

- Choose **Company Workspace** → role (Contractor, Consultant Company, Owner/Client, Supplier) → profile information → documents and terms → review → verify email.

2. Profile Completion

- Fill required company fields until readiness reaches at least 80%.

3. Company Setup

- Upload Commercial Registration, VAT Certificate, insurance or licenses as required; respond to clarifications.

4. Opportunity Creation

- Complete all five wizard steps; **Save Draft** as needed.

5. **Publish** (Review step)

- Clear readiness blockers → **Publish Opportunity**.

6. **Marketplace**

- Partners discover your Need under Browse Opportunities or Discover.

7. **Matching**

- Compatible partners appear; you receive **New match found**.

8. **Negotiation**

- Accept match → Start negotiation → discuss → submit or accept offer → Agree terms.

9. **Commercial Agreement**

- Create agreement → Submit for review → Move to signing → (optional) Award if there are competing agreements.

10. **Contract**

- Create contract → parties Sign → contract Active.

11. **Completion**

- Start execution on the agreement as applicable → Complete contract / Mark agreement completed → Close the related opportunity when appropriate.

Screenshot: Pipeline view showing Match → Negotiation → Agreement → Contract

16. Best practices

High-quality opportunities

- Write specific titles and honest short descriptions.
- Always set Need vs Offer correctly.
- Choose the collaboration model that matches the real engagement (do not use joint-venture language for a simple subcontract).
- Add skills with levels; list services clearly.
- Use work packages and milestones for anything non-trivial.
- Make VAT handling and SAR amounts explicit.
- Reach readiness of at least 80% before publish — do not publish empty and fix later.

Negotiations

- Keep commercial numbers in Offers (SAR), not only in chat.
- Accept only when scope, dates, and VAT treatment are clear.
- Use Cancel rather than abandoning silent threads.
- After terms are agreed, create the commercial agreement promptly.

Profiles and trust

- Keep availability and location current.
- Upload Commercial Registration and VAT Certificate early for company accounts.
- Add portfolio and certifications to improve readiness and partner confidence.

Collaboration success

- Respond to matches quickly while they are still **Discovered**.
- Prefer one clear commercial structure over many empty options.

- Use Pipeline weekly as your operating rhythm.
- For multi-party models (consortium or circular), align roles before publishing.

17. Troubleshooting

Why can't I publish?

Possible cause	What to do
Profile readiness below threshold or missing required fields	Complete Profile until ready (at least 80% and required fields)
Opportunity required items incomplete	Open Readiness; fix title, skills, services, commercial terms, and similar
Account pending review	Wait for approval or submit clarifications
Your role cannot publish	Ask your company owner or admin for the right role
Not signed in	Sign in again

Why can't I edit?

- You are not the owner.
- The opportunity is **archived** or **closed**.
- Your workspace role is **Viewer** or does not allow editing.

Why can't I see opportunities?

- You are on **My Opportunities** looking for others' posts — switch to **All Marketplace**.
- Posts are still **Draft** (not published).
- Posts were **archived**.
- Filters hide results — reset filters.
- A limited preview may hide full detail until verification is complete.

Why is my opportunity still a draft?

- You clicked **Save Draft** but not **Publish Opportunity**.
- Publish was blocked by readiness.
- You recovered an unsaved draft that was never published.

Why didn't matching happen?

- The opportunity was never successfully published.
- No compatible Need or Offer exists in the marketplace yet.
- Your collaboration and commercial choices may not have compatible partners yet.
- Check notifications; administrators can also review matching quality.

Why can't I access a negotiation?

- The match was not accepted, or negotiation was not started.
- The negotiation was **Cancelled** or **Expired**.
- You are not a participant.
- You are in the wrong workspace.

Why can't I create a contract?

- No commercial agreement exists yet (agree the negotiation first).
- The agreement is not far enough along, or your role cannot create contracts.
- Another agreement was awarded as the winner.
- You do not have signing or create rights in this workspace.

18. Frequently asked questions

1. What is PM-Twin?

A construction collaboration marketplace for Saudi Arabia and the GCC that takes you from opportunity to match, negotiation, commercial agreement, and contract.

2. Is PM-Twin only for companies?

No. Individuals (professionals and consultants) use Personal Workspaces; companies use Company Workspaces.

3. What is the difference between Need and Offer?

Need requests capacity; Offer provides capacity.

4. Do I need to publish to get matches?

Yes. Partner suggestions appear after you publish.

5. Can I edit after publishing?

Owners can edit if the opportunity is not archived or closed. Major changes may affect partner fit; review matches afterward.

6. What readiness score do I need?

Publishing expects profile and opportunity readiness with required fields complete and scores at or above **80%**.

7. What currency should I use?

SAR (Saudi Riyal) is the usual commercial currency.

8. How is VAT handled?

Cash commercial fields include VAT handling. Platform commercial settings commonly use **15%**. Be explicit in your terms.

9. Can I use Arabic?

Settings support العربية (right-to-left layout). You can also write Arabic content in titles and descriptions.

0. What is a workspace?

The Personal or Company context you act in; switch it from the header.

1. How do employees join?

Owners send invitations; employees open the invitation link and accept.

2. Why am I pending review?

New registrations may require administrator review before full collaboration rights.

3. What documents do companies need?

Typically Commercial Registration, VAT Certificate, insurance, licenses, and related identity documents.

4. Where should I upload company documents?

Use **Party documents**, and follow any pending-review shortcuts such as Upload VAT or Upload CR.

5. What collaboration model should I pick for a simple subcontract?

Cash Subcontracting → Task-Based Engagement.

6. When do I use Service Exchange?

When value is primarily traded services or resources rather than pure cash.

7. Who can create a Special Purpose Vehicle opportunity?

Company accounts only (not personal workspaces).

8. What is hybrid commercial structure?

More than one value component enabled (for example Cash + Barter); Hybrid is shown automatically.

9. Can I bookmark marketplace items?

No. Bookmarks are not available currently.

0. What does Archive do?

Removes the opportunity from active marketplace discovery.

!1. **What does Close Opportunity do?**

Ends the opportunity for new matching.

!2. **Can I duplicate an opportunity?**

Yes — Duplicate as Draft or as Template.

!3. **Where do I award a winner?**

On commercial agreement award actions or Admin Award Management — not on the opportunity action menu.

!4. **What is a Match?**

A suggested pairing between compatible Needs and Offers (or multi-party collaborations).

!5. **What do match confidence labels mean?**

High, Medium, or Low — a simple guide to how strong the fit appears.

!6. **Must both sides accept a match?**

Required participants must accept before the match is confirmed; declining ends that match path.

!7. **How do I start talking about price?**

Start negotiation → Offers & Counter Offers → submit amounts in SAR.

!8. **What happens when I accept an offer?**

That offer is accepted, the negotiation becomes Agreed, and you can create a commercial agreement.

!9. **Can I reject an offer without cancelling the negotiation?**

Yes. Reject keeps the negotiation open for further offers.

!10. **How do I cancel a negotiation?**

Use **Cancel negotiation** on the detail or more menu.

!11. **Should I use Messages or Negotiation Discussion for deal talks?**

Prefer **Negotiation** → **Discussion** for conversations tied to a deal. Messages is a separate messaging area.

!12. **What is the Pipeline?**

A board view across your workspace items, matches, negotiations, agreements, and contracts.

!13. **What are Applications?**

An older apply path you may still see in some views. Primary collaboration runs through Matches.

!14. **Can Viewers publish opportunities?**

No. The Viewer role is view-only.

!15. **What is the difference between commercial agreement and contract?**

The agreement is the business record; the contract is the formal signing record created from it.

!16. **Who must sign a contract?**

The signing parties listed on the contract; status becomes Active when all required signatures are recorded.

!17. **Can I terminate a contract?**

Yes — **Terminate contract** sets status to Terminated.

!18. **Where do notifications appear?**

Under **Notifications** and on the dashboard **My notifications** card.

!19. **I got “Clarification requested.” What now?**

Read the reason, upload or update documents, and resubmit for review.

!20. **Why is Browse Matches marked Preview?**

That marketplace view is available in a limited form.

!21. **Why is Map marked Preview?**

Map browsing is available in a limited form.

!22. **If I edit a published opportunity, will new matches appear?**

Publishing is when partner suggestions are created. After major edits, review your matches; publish again if your process requires it.

13. **What does Ownership “Marketplace” mean on a card?**

The post was published by someone outside your organization.

14. **How do intelligence pages help?**

Portfolio, Funnel, Risk, and Execution views summarize readiness and workflow health.

15. **Can auditors edit negotiations?**

Auditor views may be read-only: you can see the transcript and offers, but cannot change them.

16. **What is Award Management?**

An admin tool to award one commercial agreement among several on the same opportunity.

17. **What VAT rate do commercial settings commonly use?**

15%.

18. **Can I export an opportunity?**

Yes — Export JSON or Export PDF (for PDF, use Print and choose Save as PDF).

19. **What if I see “Recover unsaved local draft?”**

Choose **Continue draft** or **Discard**. Use **Save Draft** or **Publish Opportunity** to keep your work.

20. **Is practice data permanent?**

In training environments, administrators may restore practice scenarios. Treat practice data as temporary unless told otherwise.

21. **How do trainers verify matching demos?**

Follow [Demo Walkthrough verification \(Demo/UAT\)](#): admin → /admin/environments → confirm cast coverage, walk all four topologies with copied credentials, check employee/pending/admin rules, then reset and re-check.

22. **How do I switch language direction?**

Settings → English (left to right) or العربية (right to left).

23. **What is product language customization?**

Staff or owner settings can rename labels such as Opportunity, Negotiation, Commercial Agreement, and Contract for presentation.

24. **Can I create a contract without a commercial agreement?**

The supported path is from a commercial agreement.

25. **Why do joint venture options ask for equity split?**

Those engagements share capital and governance; equity fields capture the commercial terms.

26. **What payment schedule mistake should I avoid?**

Milestone percentages that do not total 100%.

27. **What are Offer capacity fields for?**

They help partners understand how much capacity you can provide.

28. **Where do I rate partners?**

Commercial agreement → Rate participants.

29. **What should sales teams demonstrate first?**

Create Need → Publish → Show match → Negotiation offer → Agreement → Contract sign.

30. **What should trainers emphasize?**

Workspace switch, readiness of at least 80%, correct collaboration model, and the Match → Contract journey.

31. **Who do I contact if account review is stuck?**

Platform administrators or Onboarding Center reviewers through your customer success contact.

19. Glossary

Term	Definition
Accept (match)	Agree to proceed with a suggested match
Accept (offer)	Accept a negotiation offer and typically agree the negotiation
Admin Portal	Operations area for platform administrators
Archive	Remove an opportunity from active marketplace discovery
Audit Trail	Chronological history of negotiation (or admin) actions
Award	Select a winning commercial agreement among competitors
Barter	Non-cash exchange of services, capacity, or resources
BIM	Building Information Modeling — a common collaboration area on PM-Twin
Cash Subcontracting	Paid delivery for a defined scope
Circular Exchange	Multi-party ring matching ($A \rightarrow B \rightarrow C \rightarrow A$)
Close Opportunity	End the opportunity for new matching
Commercial Agreement	Business agreement after negotiation (sometimes called a “deal” in older materials)
Commercial Structure	How value is exchanged (cash, barter, equity, and similar)
Company Workspace	Workspace for an organization
Consortium	Multi-party group formation around a lead need
Contract	Formal signing record created from a commercial agreement
Counter-offer	Revised offer submitted during negotiation
CR (Commercial Registration)	Company registration document used in KSA account review
Dashboard	Workspace home with summaries, tasks, and recommendations
Deliverable	Agreed output with acceptance criteria
Draft	Unpublished opportunity (or agreement or contract) still being prepared
Employee	User invited into a company workspace
Equity	Ownership stake as part of the commercial structure
Hybrid	More than one value exchange option enabled
Individual Professional	Personal-workspace user offering or seeking work
Joint Venture	Shared delivery and governance collaboration model
Marketplace	Discovery area for published opportunities and people
Match	Suggested pairing of compatible opportunities
Match score	Fit indicator shown on a match
Matching	Automatic partner suggestions after publish
Milestone	Delivery checkpoint; may trigger payment
Need	Opportunity post requesting capacity
Negotiation	Structured term discussion after match acceptance
Offer (post type)	Opportunity post providing capacity
Offer (negotiation)	Priced proposal inside a negotiation

Term	Definition
One Way Matching	Simple Need ↔ Offer pairing
Opportunity	Structured Need or Offer post
Ownership	Whether a record is Mine, Company, or Marketplace
Party	Individual or company participating in the marketplace
Party documents	Uploaded compliance and profile documents
PDPL	Personal Data Protection Law (KSA)
Personal Workspace	Workspace for an independent professional or consultant
Pipeline	Board view across your collaboration journey
Preview	Feature available in a limited form
Profit sharing	Split of profit as part of the commercial structure
Publish	Make a draft opportunity live so partners can find it
Readiness	Completeness score for profile and/or opportunity
Resource Sharing	Collaboration model for pooling equipment, people, or materials
Revenue sharing	Split of revenue as part of the commercial structure
Reviewer	Role that reviews onboarding packages
SAR	Saudi Riyal — usual commercial currency
Service Exchange	Barter-oriented collaboration model
SPV	Special Purpose Vehicle — company-only joint venture option
Sub-model	Specific engagement pattern under a main collaboration model
Two-Way Dependency	Reciprocal need and offer (barter) pairing
Validation	On-screen checks that required information is complete and consistent
VAT	Value Added Tax; commonly 15% in KSA
Vetting	Account review before full platform access
Visibility	Whether a post is discoverable in the marketplace
Work package	Unit of scope containing tasks and deliverables
Workspace	Personal or company business context for your actions
Workspace role	Permission set inside a company workspace (owner, admin, member, viewer, and similar)
